## **EXECUTIVE SUMMARY**

The Idenau council (within West Coast Subdivision) was created by presidential decree No 95/206 of 24<sup>th</sup> April 1995. It is located some 29km from Limbe city and has a total surface area of 16km<sup>2</sup>. Following the decentralisation of powers to local councils, a Development Plan for Idenau Council was elaborated from July to December 2011, through the collaboration of a Local Support Organisation (LSO), Reach Out Cameroon facilitated by the National Community-driven Development Programme (PNDP). The Plan covered a wide range of development concerns of the municipality among which are; Water schemes, Fisheries, Environment and Nature Protection, Health, Livestock. Electricity, Road networks, Culture, Women Empowerment and the family.

The inhabitants live in 8 villages, among which are native communities, fishing ports and CDC camps. It is located between latitude 4.2333<sup>o</sup>N and longitude 8.98333<sup>o</sup>E with an altitude of about 300m above sea level (asl) in the mainland area and 5m in the maritime area. Generally, Idenau municipality is found on the North of Atlantic Ocean and the windward side of Mount Cameroon.

During the elaboration of the Idenau Communal Development Plan (CDP), the following processes were carried out; Council Institutional Diagnosis (CID), Urban Space Diagnosis (USD), Village by Village Diagnosis (VVD), Strategic Planning (SP), Resource Mobilisation (RM) and Programming (Pgm) workshop. Data collected and analysed at each level of the process was restituted to the population.

The vision of Idenau Council is:

To ensure that by 2035, Idenau council area is well developed with diverse economic activities, healthy environment, adequate access to health care, commerce, water, energy, culture, education, sports, social and local economic development facilities. Accessibility is improved; touristic attractions and infrastructures are well developed thus increasing international trade, per capita income, and standard of living in the municipality.

The goal of the Idenau Council is:

To sustainably improve on the livelihood of the population of Idenau municipality by providing quality basic services in the domain of Health, Water and Energy, Education, Tourism, Environmental and Socio-economic Infrastructure so as to reduce poverty and enhance opportunities for growth and employment.

In view of the enhanced decentralisation of 2010, six strategic objectives were sketched out as follows:

- Access to educational facilities within the municipality increased;
- Access to quality health care services improved;
- Fish production Increased;
- Access to electricity supply increased;
- Development of tourists' attractions and infrastructures improved;
- Income level of women increased;
- Basic infrastructures increased;

For each of these strategic objectives, indicative investment plans were developed comprising; key activities, indicators, person(s) responsible and potential funding sources. The overall cost of the plan will be at least **FCFA 7,237,790,000** (Seven billion, two hundred and thirty-seven million, seven hundred and ninety thousand francs CFA).

## **CHAPTER ONE**

## **1.0 INTRODUCTION**

#### 1.1 Context and justification

Within the context of decentralisation in Cameroon of 22nd July 2004, powers have been devolved/ transferred to local councils making them the lead agents promoting local development in their respective municipalities in the domains of Education, Water and Energy, Culture, Sports, Health, Social and Local Economic Development. Meanwhile the Cameroon Government adopted Vision 2035 as its strategic development tool which emphasises on growth and employment as the key strategies to making Cameroon an emergent nation by 2035.

For the purpose of development and improvement of living standards of council areas, the Cameroon Government mandated the National Community-driven Development Programme (PNDP) charged with facilitating local council's in their process of development. The goal of PNDP is to support local councils in Cameroon in the process of decentralization and help them draw up Council Development Plans as well as ameliorate living conditions of the people within the council by funding their development plans.

The process draws inspiration from the 18th January 1996 Constitution, which states *inter alia* in its Article 55 that: The duty of councils, regional and local authorities shall be to promote the economic, social, health, educational, sports and cultural development of a given municipality.

The government through PNDP has selected nineteen councils in the South-West Region for the second pilot phase of the elaboration of Council Development Plans (CDP) amongst which is the Idenau Council. It was within this context that Reach Out Cameroon (REO) was recruited as the Local Support organization (LSO) to accompany the Idenau council in its development planning process.

The process of elaborating the council development plan constitutes the realisation of the council monographic and institutional diagnosis, a strategic plan and an annual investment plan, which is the focus of this present report.

#### **1.2 Objectives of CDP Process**

#### The global objective

The overall objective of the CDP is to guide the Council ensure a fair and balanced development of the Municipality, whereby the Council has the needs of the communities and carry out projects that are cost effective and meet the needs of these communities with the limited resources that she can mobilise each Year especially within this process of Decentralization.

#### Specifically the objectives are to;

- Promote participation, transparency, fairness in the selection of investment and development actions;
- Enable the Council to be able to develop partnerships, especially those which will enable her perform her role as a Development Organ of the Municipality
- Make easy the development of campaign plans of the municipal executive, projects of common and related budgets;
- Enhance coherence between the actions of the Council on the one hand, and strategic and Sectoral policies of the State on the other;
- Facilitate the achievement of the local budget;
- Promote the synergy of actions between different actors in the municipal district;
- Promote solidarity and complementarity between development actors;
- Facilitate research partnerships with development actors external and internal;
- Facilitate negotiations with donors;
- Prevent conflicts;

#### **1.3** Structure of the document

The structure of the document constitutes the following sections:

- Introduction
- Methodology
- Summary Presentation of the council
- Summary of key findings from the participatory diagnosis
- Strategic planning
- Programming
- Monitoring and Evaluation mechanism
- Communication plan for the implementation of CDP
- Conclusion

## **CHAPTER TWO**

## 2.0 METHODOLOGY

#### 2.1 Preparation of the process

The preparations for the Communal Development Planning (CDP) process in the Idenau Municipality started initially with the signing of a contract. This was closely followed by a series of harmonisation meetings with the Mayor and some council executives during which Reach Out Cameroon presented a draft execution plan which was corrected and adopted. Information was disseminated and the population sensitised on the process, with the setting up of a steering committee at the council level for the monitoring of sthe work of the LSO.

Following the terms of reference that was drawn, the official launching workshop took place on the 25th of July 2011 at the Idenau Fire Burn Club Hall and was chaired by the SDO of Fako.

During the workshop the following presentations were made:

- A PowerPoint presentation on the objectives and the expected results of the workshop by Reach Out's Executive Director
- A brief presentation of PNDP was done by the Coordinator of PNDP South West Unit
- Presentation of criteria and selection of steering committee members for follow up of the entire diagnosis process
- Presentation of PNDP South-West regional staff present at the workshop
- Presentation of Reach Out's team of consultants and facilitators

During the process of the diagnosis, all the government services and relevant institutions in the West Coast Subdivision, some Divisional and Regional delegations were visited to collect secondary data. This was done through the review of reports and existing documents on the socio-economic and environmental aspects of the Idenau council area. Primary data was also obtained through discussions with key staff of the various services using Semi structured interviews (SSI) guides and the socioeconomic and environmental form provided by PNDP.

#### 2.2 Collection and treatment of data

Data was collected and analysed using different tools. During the process, interviews, review of council documents, Focus Group Discussions and observation were used especially to diagnose the functioning of the Council as an Institution. At the level of the village, some PRA Tools were used to gather and analyse data on the different sectors and come out with the problems/needs and potentials of the various sectors. After the data collection process, statistical software was developed for data entry and analysis. The analysed data which was both qualitative and quantitative was presented in the form of tables and charts. Some of these tools that were used included the following:

#### 2.2.1 Village-by-village and Urban Space diagnosis

The process involved data collection in the villages namely Etome, Debundscha, Njonji, Sanje, Kosse II and Enyenge; and the two urban spaces of the Idenau council area namely Idenau and Bakingili. This was done through the organisation of working sessions with the chiefs and the traditional councils (quarter heads) of the concerned villages. During this exercise, urban space and village planning was done, and local facilitators identified to assist the research team in carrying out socio-economic and environmental surveys.

With the assistance of the local facilitators, meetings were held with representatives of the population (men, women and youth), drawn from some socio-professional groups such as fishermen, fish mongers, bee keepers, farmers, motor bike riders; as well as groups of vulnerable persons, during which a participatory mapping of the towns and villages was carried out. Also, data was collected on socio-economic infrastructures and way points taken.

The following stages and tools were used in collecting and analysing data at the village level:

#### Introductory Village Assembly

The process involved data collection in eight (8) villages in the council area which are found in both the maritime and the mainland area (Idenau/Bibunde, Bakingili, Etome, Debundscha, Njonji, Sanje, Kosse II and Enyenge) This took place from the 25th July to the 10th August 2011. The teams proceeded with a visit to some administrative authorities and councilors living in the villages, which went alongside the collection of some available baseline data.

#### Historical Profile

This had to do with an identification of historical events that have influenced the communities' development positively or negatively either in the domains of socioeconomic, cultural, agricultural and natural resources.

#### • Semi-Structured Interviews

SSIs are used during meetings, focused group discussions etc in bringing out detailed answers to pertinent questions and observations through structured questionnaires and follow up questions. Expectations are based on socio-economical and social environment of the community.

#### • Transect Walk

The transect walk is a means of establishing facts on petinent observations raised during semi-structured interviews. It further permits the discovery of the diversity of the village by analysing existing infrastructures taking into consideration the zoning, soil, vegetation, crops, problems/constraints, tendencies, applied solutions, solutions to be undertaken, distance (m)i.

#### • Meetings and Focus Group Discussions (FGD)

These are forums used for gathering answers and observations on relevant issues, passing out information on general nature and the validation of results and reports obtained during diagnosis.

#### • Participatory Mapping

The participatory community map is a tool that shows the physical and biological milieu of the village and further takes into consideration an understanding of the villages on the natural resources and basic socio-economic infrastructures found in their community.

#### • Simple ranking

The tool was used for the selection of members in the village development committee from the different institutions identified in the Venn diagram.

#### • Venn diagram

The tool shows in effect local institutions and organisations of the community and their relationship and involvement in the development of the community. It is also used in the establishment of local development committees taking into consideration their involvement in the development of the community.

• Way point collection Global Positioning System (GPS) device

The Global Positioning System (GPS) was used in collecting, registering and measuring horizontal and vertical distances which was represented on a map and are known as geographic coordinates.

#### • Sector-By-Sector Problems Identification, Analysis and Local Solution Planning

In order to better situate problems, a thorough assessment of baseline situation was done by examining socio economic, political, and physical background of the village and an assessment of the development situation. The techniques and tools used for background information were interviews and mapping; for instance seasonal calendar and maps (seasonal, Venn diagram and land use). For interviews; group and individual interviews were conducted from which information gathered was presented and adopted in plenary.

Problems of the communities were identified, prioritised and analysed using a gender and sector-wide approach i.e. women, men and youth. In a plenary, the village general assembly synthesized problems at group level and proposed collective problems affecting the whole community. Prioritization of identified problems was done and analysed using problem and objective trees. At the end of the exercise, somes local solutions to local problems were identified and planned using the local solution table with indicators and persons responsible identified.

#### 2.2.2 Council Institutional Diagnosis

The following methodology and tools were used in the collection and treatement of data for the Idenau council:

#### Preparation

During the preparatory stage, an introductory session was held with council executive and heads of committees during which a presentation was done on the process for the diagnosis involving council staff and some technical staff from the deconcentrated state services. The objectives, results to be obtained and the type of data to be collected were further explained i.e. a working calendar, methodology for the ralisation of the institutional diagnosis and those implicated in the exercise and their s roles.

#### Participatory diagnosis

During the participatory diagnosis certains tools of the PRA were used such as observations, informal discussions, semi-structured interviews, and focused group discussions.

#### Collection, treatment and analysis of data

The data collection process continued with individual interviews both at the level of the council and its partners (major stakeholders). Also, there was a review of some relevant council documents. Council resources persons were very much involved in the exercise so as to ascertain the transfer of experience tot he council team.

#### Validation of results and identification of axes for reinforcing the council

The results of the CID were restituted to the council executive, the steering committee and key council staff during a plenary session. Axes for council reinforcement were identified participatory and validated alongside the results of the council institutional diagnosis.

#### 2.3 Data consolidation and mapping

The consolidated data was analysed using database analysis software (Softramses data base technology software SDBTS). The results were later represented on tables, graphs, pie charts, and bar charts. The GPS data was analysesd using the GIS software (Arc GIS 9.3 and Map info) for the production of geo-referenced maps.

#### 2.4 Strategic Planning, Resource Mobilisation and Programming Workshop

The global objective of the workshop was to carry out the strategic planning workshop and elaborate the Annual Investment Plan (AIP) of the Idenau Council.

During the processes of the strategic planning, resource mobilisation and programming workshop, the following activities or methodology were used;

- Restitution of the diagnosis report by sector and by village at the delegation level ;
- Restitution of Logical Framework ;
- Programming of investments for the first year (AIP) ;
- Evaluation of the environmental strategy of the AIP and
- Elaboration of a contract tender and execution plan for the first year.

#### 2.5 Putting in place participatory monitoring and evaluation mechanism

During the strategic planning work, a follow-up committee for the implementation of the communal development plan was put in place to replace the defunct steering committee for the elaboration of the CDP.

## **CHAPTER THREE**

## **3.0 SUMMARY PRESENTATION OF THE COUNCIL**

#### 3.1 Location of the council

The Idenau council (within West Coast Subdivision) was created by presidential decree No 95/206 of 24th April 1995. Idenau is the head quarters of the West Coast Sub division located in Fako Division of the South West Region of Cameroon. It is located some 29km from Limbe city. The Idenau municipality has a total surface area of 16km2 with an estimated population of 30,000 inhabitants living in 8 villages, among which are fishing ports, native communities and CDC camps (Council project report 2010). Field survey reveals that the actual population is 8139 persons. It is located between latitude 4.233330N and longitude 8.9833330E with an altitude of about 300m above sea level (asl) in the mainland area and 5m in the maritime area. Generally, Idenau municipality is found on the North of Atlantic Ocean and the windward side of Mount Cameroon.

It is bounded to the North by a stretch of the Mount Cameroon National Park, to the North East by Buea sub-division, to the East by Limbe II municipality, to the South by the Atlantic Ocean, to the West by Bamusso sub-division, and to the North West by Mbonge Sub-division. The average temperature range is about 25-30<sup>o</sup>C and have a mean monthly rainfall of about 5000mm to 8000mm.

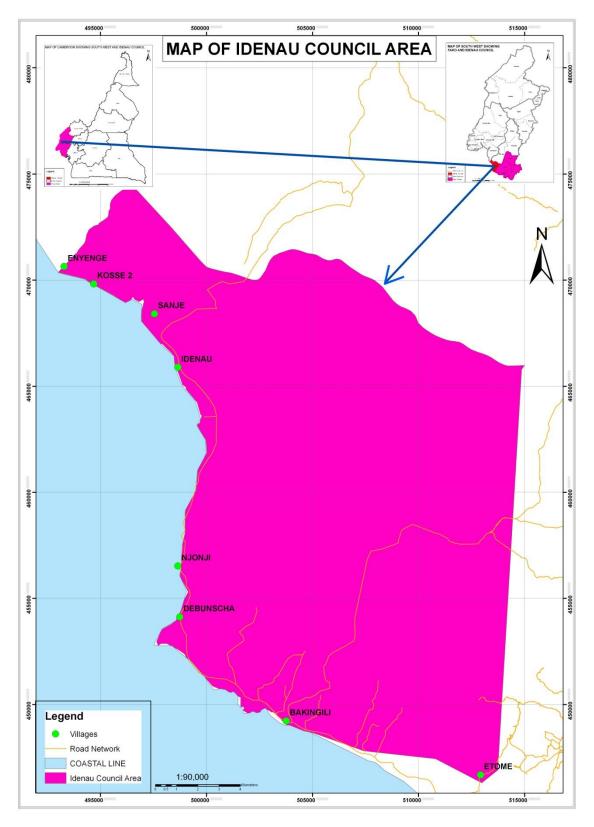

Fig 1: Map of Idenau Council Area

## 3.2 Description of the biophysical environment

The Idenau municipality has two distinct biophysical environments (Maritime and mainland). The mainland area is covered by ever green forest vegetation with some of the villages situated at the coast of the Atlantic Ocean. The coastal region stretches from Bakingili to Enyenge while the mountain/forest region covers the Northern section of the municipality including Etome village and Mt Etinde at the South East.

The maritime area consists of 2 villages, Enyenge and Kosse II, surrounded by an evergreen mangrove ecosystem with rich biodiversity. Accessibility to these villages is through the creeks or by high sea. Three quarter of the surface area has altitudes of about 5m to 20m asl. The area is risky during the rainy season due to the swampy areas and encroachment of the sea.

Three settlement types can be envisaged within the municipality. That is, the native communities, the fishing port (beach) and the CDC camps. The native communities include, Bakingili, Etome, Njonji, Bibunde, Sanje, and Kosse II. The fishing ports include Debundscha beach, Isobe, Bibunde, and Enyenge fishing ports. The CDC camps include Wete-Wete, Isongo, Caraboat, Mbanda, Debundscha, Njonji, Bibunde, Scipio, Rechtsfluss and Soden.

#### 3.2.1 Climate

Idenau council area has an equatorial climate that is marked by two distinct seasons (dry and rainy season). Rainfall is unimodal and spreads from March to November with a temperature range of about 25-28°C. The rainfall rises up to 4000 mma-1 with its peak being in July, August and September. The peak of the dry season falls in December and January as shown in the table below.

#### Table 1 Seasonal calendar

														6
Month/ Season	Jan	Feb	Mar	April	May	June	July	Aug	Sept	Oct	Nov	Dec		Norn
Dry Season														Peak
Rainy Season														Mild

#### Source: Debundscha weather station

Average annual temperature is 27°C and the wind speed is 2 mph. The mean annual relative humidity ranges between 80% and 95% (CDC weather records). These climatic conditions make the soil favourable for the growth of oil palms, cocoa, cassava and other food crops. The West coast is a distinct area with respect to rainfall pattern. Debundscha is noted to have the highest rainfall in Africa, and rainfall is observed throughout the year.

The dry season is characterized by dry winds that blow from the mountain in a North East to a South Westerly direction. During this period, daily temperatures are high with a slight drop in the night. During the rainy season rains are heavy creating a favourable environment for rain-fed cultivation. The rains are occasionally associated with storms and floods that are destructive to crops and property.

Legend:

#### 3.2.2 Soils

The dominant soil type in this municipality is the dark fertile and stony volcanic soils with patches of alluvial and sandy loam soils (MINADER report). The hills are a dissected plateau of old volcanic rocks with a few up-faulted sedimentary belts. These soil types coupled with the level terrain is very good for agriculture generally and plantation agriculture in particular.

#### 3.2.3 Relief

The relief of the council area is a flat surface with gentle slopes and patches of steep slopes towards the mountain. This level nature of the area greatly accounts for the choice of the location of the Cameroon Development Cooperation (CDC) plantations on the mainland areas. There are swamps, creeks and sand-pits at the coastal region close to the Atlantic Ocean.

#### 3.2.4 Hydrology

Besides Atlantic Ocean, the main land area of the council is endowed with so many water courses including rivers, creeks, streams, and springs. Some of these water courses include; Ndiweh spring of Etome and "cold source" of Bakingili which serve as the main source of can water and the point of construction of community catchment. Some of these water courses, empty into the sea.

# **3.3** History and People of the council (origin of the people, population, ethnic groups, religions, main economic activities)

3.3.1	Size and structure	of the population
-------	--------------------	-------------------

Village	Men	Women	Children	Total Pop.	Percentage (%)
Bakingili	295	337	194	826	10.15
Idenau Palms estate	167	180	574	921	11.32
Etome	40	38	100	178	2.19
Njonji	132	112	141	385	4.73
Debunscha beach	220	191	134	545	6.69
Debunscha Palms estate	92	191	551	834	10.24
Idenau-Bibunde	759	672	711	2142	26.32
Enyenge	644	676	494	1814	22.29
Kosse II	117	90	115	322	3.96
Sanje	61	73	38	172	2.11
TOTAL	2527	2560	3052	8139	100

**Table 2** Population Distribution by village and gender in Idenau Municipality

Source: Reach Out Field Survey 2011

#### 3.3.2 Ethnic Groups and inter-ethnic relations

Two indigenous ethnic groups were recorded in the council area: Bakweri in Etome and Bomboko in the other native communities. Non-indigenes have also settled in these areas and they include; Oroko, Bakossi, Bayangs, North westerners, Francophones all from Cameroon and foreigners from Nigeria, Benin, Equatorial Guinea, Togo and Ghana. These inhabitants/settlers engage in agriculture, fishing and other income generating activities including the civil service.

#### 3.3.3 Religion

The inhabitants of Idenau municipality practice Christianity, Islamism and African traditional religion. Christianity is the predominant religion practiced by more than 90% of the population. The Christians worship in different denominations, prominent among which are Catholic, Presbyterian, Apostolic, Baptist and Full Gospel. There are also pagans who adhere to African traditional religion ('masquerade' and shrine worship) and Moslems, both of whom constitute less than 10% of the population.

Catholics, Presbyterians, Baptist and Full Gospel have been involved in evangelization for a long time and have made efforts to improve on the educational development of the municipality. Proximity of the council to the Federal Republic of Nigeria has facilitated the influx of several new Christian religious movements.

#### 3.3.4 Mobility of the population

The Idenau municipality is endowed with diverse resources and opportunities which are at the reach of the average person. These include the fertile soil, forest resources, fishing grounds, unskilled labour opportunities and water transport medium to/from the country. Consequently, the municipality has been vulnerable to migration within and out of the country especially Nigeria and Ghana. Mobility of the population involves; rural exodus (rural urban migration), rural to rural area migration, urban to rural migration and international migration to and from Nigeria, Ghana, Mali, Benin, Togo and Equatorial Guinea.

These migrants move in search of economic engagements, further education, vocational training.

The presence of CDC in the municipality has attracted a considerable proportion of skilled and unskilled workers from other parts of the country.

#### 3.3.5 Actors of local development

Several organisations have made valuable contributions towards the development of the municipality. Among these are, Cameroon Development Corporation (CDC), RUMPI, ACEFA, Canadian Aid Fund, Reach Out Cameroon (REO), FEICOM, PSMNR-SWR, TOTAL, Camtel, MINADER, MINEPIA, MINFOF, and MINEDUB. REO has carried out study on capacity building, wealth creation, and HIV and AIDS in the municipality. There are common initiative groups and other community based organisations that work together

for the development of the municipality. The national and international actors of local development in the council area include the following:

- CDC: Provide employment to inhabitants, assist in road maintenance, have a weather station to record meteorological information for the west Coast and supply portable water to Njonji village and the camps.
- RUMPI: Have given out support funds to some CIGs to improve on their activities and outputs.
- ACEFA: Have given grants to livestock farming groups to confine animals and also improve production.
- FEICOM: The loan for the ongoing water project for Idenau Township was acquired from FEICOM.
- Reach Out Cameroon: It has co-financed projects within the council on HIV and AIDs, support to orphans and vulnerable children (OVCs), wealth creation, and capacity building and is currently carrying out monographic study, Institutional diagnosis and strategic planning (ongoing) for the council.
- EURO OIL Cameroon: Currently carrying out drilling of petroleum in the platform zone of the sea.
- GLENCOL oil company: Currently carrying out seismic study on the exploration of petroleum in the municipality
- Catholic: Operating a primary school at Idenau.
- Baptist mission: Operating a nursery and primary schools.
- Full Gospel: Has functional nursery and primary schools in Idenau.

#### **3.4** Basic socio-economic infrastructure

The main economic activities are fishing, fish processing (mongering), agriculture, livestock production, international trading, and small scale businesses. The basic socioeconomic infrastructures include; 2 Government Health Centres, 2 Private (CDC) dispensaries, 3 lay private clinics, 1 Professional College of Fisheries and Agriculture, 1 Government High School, 1 Government Technical College, 1 SAR-SM, 5 public and 3 private Nursery schools, 9 public and 4 private Primary schools, AES Electricity network, portable water provided by CDC, Mt Etinde/Semme water source, boreholes, Idenau-Batoke-Limbe road network and Idenau wharf, sectoral offices, CDC plantations and 2 financial institutions (Credit Union and FIFFA bank). Transportation in the maritime is through the high sea or creeks. Commercial transporters use large sea engine boats with various horse powers. The council is also blessed with tourist attractions such as the lava deposits, Lake Nachtigal, beaches, Mt Cameroon, among others. CDC camps including Njonji and Etome are the only communities with pipe borne water.

## 3.5 Assets, potentials and constraints of the Municipality

The Idenau municipality has significant biophysical features both in the maritime and mainland area. If exploited can enhance development in the Municipality.

Sector	Assets/ Potentials	Village	Constraints
Water	Springs, Rivers, Sea, Creeks, Scan water	Etome, Njonji, Bakingili to Enyenge, Kosse,	With the exception of Etome, the water schemes in the other
		Bibunde and Sanje	communities are non functional
Energy	Energy	Idenau, Bakingili, Njonji, Debundscha, Sanje	Low voltage
Mines, Industry and	Sand	Idenau, Bakingili, Debundscha, Njonji,	- Inadequate exploitation
Technology		Enyenge, Kosse II and Sanje	- Poor quality of sand
	Petroleum	The coastal region from Bakingili to Enyenge	<ul> <li>Limited access to petroleum benefits; Poor community participation and Restriction to carry out fishing in petroleum exploitation sites</li> </ul>
Fisheries	Fish species	All the villages	- Water pollution
			- Indiscriminate fish catch by industrial fishermen
Livestock	Animal species	All the villages	- Inadequate financial assistance
Post and Tele- communication	MTN and Orange antenna	Debundscha, Njonji, Idenau, Bakingili	Poor network coverage
Commerce	Food crops, fresh and smoked fish, crafts	Etome, Njonji, Bakingili to Enyenge, Kosse, Bibunde and Sanje	- Absence of a market structure in the entire municipality
Small and Medium	Craft work, (boat making and repairs), petit traders	Debundscha, Enyenge	- Inadequate marketing
size enterprises			- Poor identification of skills
Tourism	Mount Cameroon National park	Etome, Bakingili, Njonji	<ul> <li>Illegal logging</li> <li>Inadequate knowledge of forestry laws</li> </ul>
	Lake Nachtigal	Debundscha (Njonji)	- Difficult accessibility to the Lake
			- Inadequate exploitation of the site
	Waterfall	Enyenge, Etome	Inaccessible roads
	CDC Oil mill and Plantation	Idenau, Debundscha	Environmental pollution
	Beaches	Debundscha, Bakingili, Idenau, Enyenge,	- Deposit of waste from the sea and No touristic facilities
		Njonji	- Inadequate exploitation of the sites
Forestry and	Forest, NTFPs and other resources	Idenau, Bakingili, Njonji, Etome, Sanje	- Illegal exploitation of timber species
Wildlife			- Unsustainable exploitation of forest resources
	Presence of rare and endemic wildlife species such as; Chimpanzee, Monkey, Drill, Elephants,	Etome, Idenau, Kosse II, Bakingili, Njonji	Gradually going extinct

Table 3: Assets, potentials and constraints of the Idenau Municipality

## **CHAPTER FOUR**

#### 4.0 SUMMARY OF KEY FINDINGS OF THE PARTICIPATORY DIAGNOSIS

#### 4.1 Summary of the council institutional diagnosis

#### 4.1.1 STRENGTHS AND WEAKNESSES OF THE COUNCIL INSTITUTION

An analysis of the strengths and weaknesses with a focus on human resource management, financial resource management, management of council assets and management of relations was conducted with representatives of the main stakeholders, staff and councilors of the Idenau council.

The following tables show results of the strengths and weaknesses as analysed.

#### A. Strengths

Enoug	b staff
	eadership skills
	trained staff
H H H H H H H H H H H H H H H H H H H	istence of staff delegate
	r equality
	ication of areas of revenue collection
Annua There	I budgeting is effective
There <b>Geo</b>	is democracy in decision making
Counc	l office and 2 council buildings (Scipio / Bakingili)
2 sprav	ying cans, 1 pick axe and 2 wheelbarrows and 2 handy cans
10 con	nputers, 2 Laptops, 3 automatic stabilizer, and 1 photocopy machine
<u>ب</u> 2 digit	al cameras, 5 wall clocks, Counterfeit dictator
Refrige	erator and 4 Air conditioners
Refrige A Libra 1 upho Confer	ry and assorted books

	ilities for collaboration and partnerships with neighbouring councils
(coost)	al councils, divisional councils, etc)

### B. Weaknesses

	Insufficient qualification of staff
	Insufficient monitoring / evaluation of staff
	Non respect of hierarchy by some council personnel
	Hijacking of some staff functions by others
es	Wrong placement of workers
nrc	Irregular advancement
SSO	Insufficient incentives
R	Non respect of labour code on seasonal employment
nar	Poor relationship among staff
Human Resources	No plan of action for the council
-	Women not occupying key positions in the council
	Workers not regular at job sites
	Poor monitoring and evaluation of projects at all levels (committees, councilors,
	mayors etc)
	Insufficient revenue collectors
	Unrealistic budget
	Insufficient follow up in twining
	Insufficient revenue collection
Sa	Insufficient working materials (during raining seasons)
nrc	Poor control mechanism for revenue collection
SOI	Revenue resources not utilized e,g house rents, tippers etc.
Financial Resources	Non compliance of the budget
cia	Non implementation of the budget
าลท	Few skilled staff
Ë	Poor relationship with stakeholders in revenue collection
	Dilapidated public toilets
	Insufficient toilets
	Insufficient council buildings
6	No council (hall)
set	No market shades
Council Assets	No fence around the council office
Jcil	Lack of pavement in the council premises
our	No water in the council premises
C	No pipe borne water in the municipality
	No street lights and garbage van
	Insufficient backups
	No internet connections and media network e.g CRTV
s	No caterpillar (heavy equipment)
set	Bad state of vehicles
As	Bad state of motorbike
ncil	Insufficient furniture
Council Assets	Insufficient office space
0	Insufficient laptops and computers

	No health facilities
	Poor infrastructural facilities (roads)
	Poor constructed bridges, drainage systems and culverts
	Insufficient spraying cans
	Insufficient sanitation equipments
	No beach has been developed
	No land for re-settlement
	Poor drainage systems
	No maintenance of street roads
	Municipal police not equipped
	Inability of the council to generate income from the rich coastal beaches
	No home facilities for organizations and civil servants
	No hotels to attract tourist in the municipality
	No slaughter house
	No sailing and landing site for artisanal, semi industrial boats
	Incomplete and abandoned projects by the council (smoke fish, ovens, water
	project)
S	No play ground in the municipality for relaxation
tne	No speed brakes
Relation with Partners	No smoke fish market
th	Inadequate equipment for hygiene and sanitation
Š	Dirty municipality
ion	The council permits the construction of houses without toilets
lat	Absence of health facilities
Re	Poor policies and control of animal and non functional market
	Insufficient land for school
	Insecurity in the municipality – rape, theft etc
	Poor collaboration with competent service
	Non involvement of stakeholders in developmental matters
	Poor execution of projects
	No community hall
	Uneven distribution of light in the municipality
	Power struggle instead of team work
	Poor drainage system for CDC waste
	Non consultation of services concerned in the execution of projects
l	

#### 4.1.2 OPPORTUNITIES AND THREATS FOR THE REINFORCEMENT OF THE COUNCIL INSTITUTION

An analysis of the opportunities and threats with a focus on human resource management, financial resource management, management of council assets and management of relations was conducted with representatives of the main stakeholders, staff and councilors of the Idenau council.

## A. Opportunities of the council

Human	Existence of partners for training (FEICOM, PNDP, REACHOUT)		
Resources	Qualified service heads (consultants)		
	Unemployed qualified youths		
Financial	Existence of training institutions e.g. CEFAM, etc		
Resources	Twining with other councils		
Resources	Existence of funders e.g. FEICOM, PNDP etc		
	Existence of sources of finances		
	FEICOM, PNDP, REACHOUT, CAMTEL		
	Ministries of Urban Development, Public Works, Economy, planning and		
Council Assets	regional Development, Public Health etc		
	Development of natural resources		
	The CDC and the BIR		
	Ministry of Land Tenure		
	Community Support		
	The existence of a good beach and seaside		
	The presence of institutions like FEICOM, CEAC, PNDP, REACHOUT, CDC etc		
	Good road linking Limbe and Idenau		
	Availability of security units like the BIR camp, gendarmerie brigade and		
Relationships	police post		
with Partners	Collaborative stakeholders		
	Existence of a forum for inter-council collaboration and partnerships i.e		
	UCCC (national, regional and divisional levels)		
	Networking with other coastal councils for projects of common concern		
	Availability of touristic sites i.e. Lake Nachtigal, Lava flow site etc		

## B. Threats of the Council

Human ResourcesPoor collaboration from the public e.g. on garbage disposalNon confining of animals by the public Resistance to respect town planning regulation Natural hazardsFinancial ResourcesPoor collaboration with stakeholdersFinancial ResourcesNon usage of the market Tax evasion Environmental pollution and fire disastersTaxation department in council office Migration of fishermen Bad roads especially during the raining seasons Inadequate information for the municipality
ResourcesResistance to respect town planning regulation Natural hazardsFinancial ResourcesPoor collaboration with stakeholdersFinancial ResourcesNon usage of the market Tax evasion Environmental pollution and fire disastersTaxation department in council office Migration of fishermen Bad roads especially during the raining seasons
Natural hazards         Poor collaboration with stakeholders         Financial         Resources         Tax evasion         Environmental pollution and fire disasters         Taxation department in council office         Migration of fishermen         Bad roads especially during the raining seasons

Council Assets Bad roads especially during the raining seasons
Inadequate information for the municipality
Resistance from tax payers
Poor collaboration between the council and its community
Deforestation in the municipality
Management of Relations
CDC expansion
Eruption of the mountain and the flow of magma (LAVA)

#### 4.2. Summary of Key Findings by Sector

#### 4.2.1 Agriculture and Rural Development

Agriculture is the second most important economic activity of the Municipality. Plantation agriculture carried out by CDC is the most dominant and covers a vast area of land space.

CDC has its main estates in Idenau and Debundscha. The fertile volcanic soils and the mixed maritime and equatorial climate provide a favourable condition for the cultivation of a variety of food (plantains, cassava, cocoyam, egusi and maize) and cash crops (oil palms and cocoa) as well as vegetables, coconuts and other fruit crops within the municipality. So far, some common initiative groups (CIGs) in the council area have received improved varieties of cocoa, oil palm and cassava from RUMPI and the Programme for Sustainable Management of Natural Resources in South West Region (PSMNR-SWR).

Some small holders of oil palm farms were recorded in Bakingili, Idenau, Njonji, and Sanje and most of them process their nuts using private/ group palm oil milling machine.

Most of the farmers groups in the mainland area of the municipality have benefited from the Support Funds of MINADER through RUMPI and ACEFA. The scheme was aimed at assisting farmers to improve on their farming methods with the ever available technical Knowledge.

Some of the problems faced by farmers in this sector include:

- Pests and diseases attack on cocoa (black pod, capsid) and cocoyam (*Pythium* sp)
- Difficulty of evacuating produce from the farm to the market due to the poor states of farm-to-market roads.
- The high cost of inputs to boost production
- Poor organization of farmers/group dynamics leading to disorganized marketing of agricultural produce.
- Inadequate knowledge of the market information system (MIS)

#### 4.2.2 Livestock, fisheries and animal industries

This sector is the most vibrant within the municipality. Although livestock is not very developed, fishing is however being practiced by a good proportion of the Cameroonian population and foreigners especially Nigerians, Beninese and Ghanaians. There is a professional training centre of young fishermen situated in Debundscha and created in 2004.

#### Livestock Production

Livestock and animal rearing is also practiced within the municipality. Animals reared are, pigs, goats, fowls, dogs and cows in Bakingili and Njonji cattle ranches. The animals are confined in locally constructed fences though about 20% of them are straying animals. The sector has several challenges, among which are ecto and endo parasites which affect all species (MINEPIA, 2011). The ecto-parasites include; ticks, fleas, mites while the endo parasites include; Ascaris, Strongylex and tapeworm. The goats are affected by the contagious caprine pleuro pneumonia, pests of small ruminants and foot rot. The pigs are affected by African swine fever, Erysipelas and piglet anaemia, while poultry suffers from coccsidiasis.

The limited access to veterinary services coupled with the prevalence of the above pests and diseases, account for the reluctance of animal breeders to increase production.

#### Fishing

Fishing is the principal economic activity within the municipality and also constitutes the major source of revenue collection for the council. The type of fishing carried out by the communities is mostly artisanal, through the use of canoes and small-sized engine boats. Fishing methods include sports fishing by divers, boats, canoes, and hooking. Fishing is mostly done by men while women are involved in fish smoking and selling.

Greater populations of the fishermen are Nigerians, Beninese, Ghanaians and few Cameroonians. Some of the women are grouped into fish mongers associations in which they buy fresh fish and smoke before taking to Limbe and at times to Nigeria where there is a ready market.

Some of the problems faced by this sector include;

- Insufficient fishing materials (boats, engines nets, hooks, etc)
- Limited access to fishing in platform zone
- Indiscriminate fishing approaches by trawlers
- Insecurity from BIRs at the sea
- Conflict between fishermen (Nigerians/Cameroonians)
- Discrimination by fishermen who select whom they sell to.
- Fish Poisoning and use of explosives
- High cost of animal feeds

#### 4.2.3 Forestry and Wildlife

The Idenau council area falls under the maritime and equatorial forest area with two distinct vegetation types - the coastal mangroves and the equatorial rain forests. The mangrove forest is insignificant as it occupies the creeks, a portion of Debundscha beach, Isobe, Bibunde and Enyenge.

The municipality has patches of primary and secondary forest which is unevenly distributed. Part of it has been demarcated within the MCNP. Sustainability has been ensured by forestry laws executed by MINFOF authorities and other conservation partners such as PSMNR-SWR.

#### Forest Exploitation

Many activities have been going on within the forestry sector of the municipality. From FGD, it was revealed that the rich diversity of plant and animal species that existed in the forest has been depleted. The forest is maintained in patches while a vast portion of it has been deforested for farming activities, and illegal timber exploitation.

Forest resources including timber, NTFPs, and wildlife have been exploited in an unsustainable manner. The species exploited are; Black and White Afara, Camwood, Caraboat, Iroko, Mahogany, Njabe, Opepe, Small leave and Bobinga. Timber is collected for local use and for commercial purpose. Those for commercial purposes are either transported to Limbe and environs or to neighbouring Nigeria through Idenau wharf. An exploiter who requires timber for commercial purposes is requested to present a permit from MINFOF.

#### Wildlife

The MCNP (58.178ha) provides an extensive area of habitat within Mount Cameroon region suitable for species such as the forest Buffalo, drills, chimpanzee, monkeys, bush pigs and elephants. SSIs revealed that, hunting was an important economic activity carried out by some adult males in the municipality. Few hunters still value the activity and carryout local hunting and trapping of animals such as alligators, antelopes, cane rat, porcupine, squirrel, deer and crocodiles.

#### 4.2.4 Environment and Nature Protection

The Idenau municipality is endowed with sensitive zones of ecological importance. These include; the sea, forest, mangrove, swamps, mountain and creeks as well as the resources within it. The sites have various natural and mineral resources but without any protection status. These natural sites are essential in providing habitat for different aquatic and terrestrial life forms. Mount Cameroon has the most frequent eruptions of any West African volcanoes. A large satellite peak (Mt Etinde or little Mt Cameroon) is located on the Southern flank near the coast. Part of this little mountain extends to Etome village. These require serious environmental protection through geological research and recommendations. Indiscriminate dumping of refuse (human and household waste) and environmental pollution was a course for concern in the council area. Poor methods of waste management was observed especially waste from small holder oil processing units located near water bodies as well as sludge from CDC oil mill in Idenau. The sludge is dumped in the streams and the process eventually pollutes the water and the air.

The use of pesticides, herbicides and fungicides by small holders and CDC plantations in the area also leads to Environmental pollution and harm on susceptible soil organisms as well as the emergence of invasive species with negative ecological effects. These affect the environment and thus require programmes on environmental impact assessment and control.

#### 4.2.5 State Property and Land Affairs

A great proportion of the land within the municipality is occupied by CDC plantations and large plantations owned by some elites. The MCNP also cuts across the municipality. All this coupled with the sensitive zones has drastically reduced access to agricultural land and even limited site for settlement extension. For example, the settlement area of Enyenge, Debundscha beach and Isobe fishing port are potential floodable zones normally restricted for habitation by the state.

The site for settlement extension is limited creating land tenure and acquisition crisis. Considering the land crisis of the municipality, CDC has lease part of its land as new layout to communities around the plantations. The land leased to the communities by CDC is sold out by local authorities rendering the inhabitants vulnerable to land scarcity.

#### 4.2.6 Urban Development and Housing

Within the context of the participatory diagnosis, the Idenau council identified two localities in the sub division that they intend to develop as their urban space. These included Idenau and Bakingili. These urban spaces were identified based on the fact that they are most developed with respect to population size, economic activities, and social infrastructures among other development parameters. However, the existing infrastructure is not well developed. The water supply is not functional, electricity supply is inadequate. There is need for expansion of the road network in the mainland

areas and construction of speed brakes to reduce the incidence of road accidents. The urban spaces are planned but the housing is haphazard. More than 90% of the houses do not have authorized plans.

#### Housing

Housing in the area is of three main categories; temporal/plank/"caraboat" walls, semi-permanent and permanent buildings all with corrugated aluminium sheets. Eighty percent (80%) of houses are constructed of temporary material such as "caraboat" while about 20% are built of permanent and semi-permanent material like concrete blocks and corrugated aluminium roofing sheets. The average number of rooms per rural house is 3-5. The average number of persons living per household is about 8, which gives a ratio of about 2 persons per room.

#### Land Use System

Land use in Idenau municipality is changing rapidly due to population increase and agricultural development. As such, land scarcity is increasingly being feasible. There are various land use types in the area which include settlement (native communities, camps and beaches), national park, forest, secondary forest, fallow land, farmland, plantations (CDC and private) and water bodies (Atlantic Ocean, river, stream). Primary forests are owned by the village, while individual ownership rights are only being conferred on land that is cultivated.

Generally, two settlement patterns were envisaged in the municipality. That is, linear and clustered settlements. Linear settlement and clustered or nucleated settlement

#### 4.2.7 Territorial Administration, Decentralization and maintenance of order

The Divisional Officer is at the head of the administrative unit of the sub division. He has an assistant. The Divisional Officer, in collaboration with heads of technical services, co-ordinates and oversees the activities of government services. He ensures the functioning of state institutions. He works in collaboration with village authorities to settle disputes of different gravity. The local authorities or chiefdoms are classified into different categories; first, second and third class. The paramount chief (first class) of the Bomboko clan is from Bakingili and has a regent who is a third class chief.

There is a Gendarmerie Brigade in Idenau headed by a Commander, a Police unit with two services i.e. special branch and Public Security office in Idenau and a post in Enyenge. The BIR camps are based in Idenau and Isongo.

#### 4.2.8Basic Education

Generally, there is availability of basic education for children within the municipality but there is limited access to quality basic education. Parents make considerable efforts to ensure that their children acquire basic education.

A total of 8 Nursery (5 Government and 3 Private) and 13 primary Schools (9 Government, and 4 private) were recorded in the council area.

Diagnosis shows that, few schools have permanent structures and required number of classrooms, while others have but semi permanent buildings. Hence, in order to improve on the needs of basic education in the Municipality, more classrooms needs to be constructed while others with dilapidated buildings renovated. Secondary data from Sub Divisional Inspectorate of Basic Education Idenau revealed that the total needs include; 13 latrines, 35 classrooms, 500 desks for primary, 200 low tables for nursery, 42 tables, 41 chairs and 12 head teachers' offices in public schools of Idenau, Scipio, Sanje, Enyenge, Kosse II and Debundscha.

#### 4.2.9Secondary education

The municipality has two main secondary schools which are found in Bakingili and Idenau. Table 12 below shows a summary of Secondary schools and vocational training Colleges in the council area.

Diagnosis shows that, two secondary schools (G.H.S. Idenau and G.T.C. Bakingili), one professional college and a vocational education centre (SAR/SM) are found in the Municipality; all of which are in the main land area. With the large number of pupils in post primary level, there is the need for Government to create more schools in the council area.

There is a good structure for the secondary schools in Bakingili and Idenau though the classrooms are not sufficient relative to the students.

#### 4.2.10 Higher Education

There is a professional institution of Fishery and agriculture within the municipality. Students are admitted in two phases; trainers with at least a Bachelors degree and youths with at least first school Leaving certificate. After graduation, trainers are assigned to agricultural training schools where they continue to train the youths in agriculture and group dynamics. The youths are settled with a reasonable capital to establish and practice what was studied in school. When students graduate from secondary and high schools, they have to continue with their university education out of the Municipality.

#### 4.2.11 Public Health

The health care units in the municipality are within the Limbe health district. There are nine health centres (2 Government, 2 CDC and 5 Private) in the entire Municipality. The health centres are poorly equipped and have insufficient personnel, inadequate health facilities, and infrastructures. Minor cases are handled by these health units while severe cases are referred to Limbe Regional hospital. There is no health care unit in the Maritime area. There is high birth rate (150/year) and high infant mortality in the municipality. Few cases of maternal death after delivery have been recorded. Generally, the population is aware of the existence of HIV/AIDS. From interviews conducted with the personnel of the health centres/clinics, it was revealed that less than 5% of the population voluntarily goes in for HIV/AIDs screening. During ante-natal care, pregnant women are being tested to know their HIV status. If positive, she is sensitized and followed up to prevent transmission from mother to child during delivery. Fifty six cases of HIV/AIDS have been recorded from 2009-July 2011.

#### 4.2.12 Transport

The transport system is partially developed. It is in two categories; land transport for mainland area and water transport for maritime area. In the mainland area, there is a total of about 300km of road in the municipality, 29km of which has been tarred. The main road from Limbe to Idenau cuts across three municipalities (Limbe I, Limbe II and Idenau) and it is well tarred. Motor able earth road was observed from Idenau to Sanje, Bibunde new layout, Njonji to Isobe, Debundscha camp to Debundscha beach (Makale) and Bakingili to Etome through Batoke in Limbe II. They are usually plied by commercial motorbikes and hired vehicles to carry fish at the beaches.

Transportation in the maritime is by commercial engine boats and canoes from one village to the other. The engine boats anchor at Idenau conveying persons and goods to Enyenge, Bamusso and neighbouring Nigeria, Gabon and Equatorial Guinea. Inter village transportation is done by hand pulled canoes. The fastest means of transport in the maritime area is by speed boats with passengers using life jackets for security.

#### 4.2.13Tourism

Idenau municipality is endowed with natural touristic potentials and mineral resources both in the mainland and maritime areas. The potentials range from, Sea/Atlantic Ocean, fishing ports/beaches, Islands, sandy beaches, creeks, mangrove vegetation, national park, forest, waterfalls in Enyenge and Etome, lava deposits in Bakingili and Idenau, crater lakes in Debundscha/Njonji, boat anchor at Idenau wharf, and the active volcanic mountain at the Northern section of the municipality. The patches of shiny dark sand at the beaches coupled with the slanting slopes are captivating. The beautiful sea breeze in addition to the good maritime and equatorial climate is also of positive touristic interest. The table below represents the location of various tourists' attractions in the municipality.

Despite the poorly developed state of these potentials, tourists still visit the area yearly. In 2009 and 2010, a record of respectively 5,490 and 7,680 tourists visited the municipality. Recently, up to July 2011, a total of 1,870 tourists have visited. Most often, more tourists visit in summer and towards December. If these potentials are developed, they will eventually improve on the economy of the localities generally and the municipality in particular.

#### 4.2.14 Commerce

Commercial activities within the municipality were carried out in various business centres such as, tailoring workshops, barbing and hair dressing salons, motor mechanics, restaurants and off-licences, mobile telephone shops and call posts, petit trading of clothes and food stuff, banking and transportation. The main supply centres for goods within the municipality are Limbe, Douala and Nigeria.

There is no market structure in the whole area. A market with temporal sheds was constructed at Bakingili but it did not go on for long. The area has now been used for the construction of a multipurpose Tele-centre by Camtel. Buying and selling goes on at the beaches and petit trading centres. The "bayam-sellam" applies faulty measures to buy goods and obtain services from community members.

Other business ventures include hotels, provision stores and drug stores.

#### **Financial Institutions**

The municipality has two main financial institutions; FIFA (First Investment for Financial Assistance) bank and the Buea P&T Credit Union both of which are located in Idenau. The credit union which is an affiliate to the Cameroon Credit Union League (CamCCUL), has two workers, with a weak membership. A greater proportion of its members are men with few women. The challenges faced by this institutions range from irregular saving, late loan repayment to loan delinquency. The inhabitants are not well sensitized on the services of formal financial institutions within the municipality. Majority of the population, especially the women are members of various 'njangi'

groups, through which they carry out local savings and loans schemes.

#### 4.2.15 Energy and Water Resources

#### Water

Water supply in the area is mainly by community water schemes and CDC water project. Only the CDC camps, Etome and Njonji have functional pipe borne water. The water in camps and Njonji is supplied by CDC while that at Etome is community water supplied by parliamentary grant. Community water schemes have been executed in Bakingili, Debundscha beach and Idenau but it is non functional due to different faults in the connections. Bore holes were found at the Debundscha fishery school and

Idenau in mainland. The access to potable water is one of the major problems of the municipality. More than 80% of the population of Idenau municipality drinks untreated water from bore holes, wells, streams and springs.

#### **Energy Resources**

Four of the main communities (i.e. Bakingili, Debundscha, Njonji and Idenau) and the camps have electricity supply by AES-SONEL.

The Municipality also has a very good energy potential (waterfall) in Enyenge which if exploited will generate electricity in the maritime. Sanje community has a leister generator and few inhabitants also own private generators which facilitate energy supply in homes and business centres. This method of electricity supply turn to increase the sources of expenditure due to high cost of fuel and cost of transportation to/fro the village to purchase fuel. Majority of households in the villages use local lamps to have light in their homes. Consumers of AES-SONEL electricity supply have to travel to Limbe to pay their bills since there is no AES-SONEL commercial service in Idenau.

Electricity is a major problem in the Sanje, Etome and the maritime communities. There is need to extent rural electrification programme and improve AES-SONEL electricity supply to other communities in the Municipality.

#### **4.2.16** Culture

Historically, the cultures of the Idenau people reflect their ethnic background. They originated from the Bomboko clan and inter-married with the Bakweri and Creole of Limbe. All the native communities are Bomboko except Etome that is Bakweri. They speak similar language wherein they can understand each other, have a common tradition, set ups and beliefs.

H.R.H. Chief Inoni Ephraim of Bakingili is the paramount chief of the entire Bomboko clan. The culture of the municipality is portrayed through their dressing, music, housing and traditional dish. The culture is manifested in Malay dance, Ekpe society dance, Amekoko, and Meringe dance. The common staple food is timana mbusa (kwacoco and palm nut soup). The Bakweri of Etome exercise and practice a culture influenced by the "Epasa moto" of the forest while that of the Bomboko is influenced by the sea and mountain forest. These traditional manifestations are more comfortable when organised in the village community hall but only Etome and Njonji have community halls.

Two ground stands are found in the municipality in Idenau and Bakingili. There are few historical patterns of buildings found in the municipality and no museum is available. The memory bank of the Bomboko culture is gradually being eroded or going extinct.

#### 4.2.17 Public Works

The delegation of public works is not present in Idenau. However, it was noted that they have taken part in the grading and construction of some earth roads and culverts respectively. Most of the earth roads have not been maintained for many years and they are practically impassable in rainy season. The council equally does not have road maintenance equipment. The problems identified by the community include poor drainage systems, poor road maintenance, poor construction of culvert and bridges, among others. More so, the main tarred road at Limbe-Idenau high way has recorded high incidence of road accidents due to absence of speed brakes in the villages, no signs at schools, critical points and positions where a number of accidents have occurred.

#### 4.2.18 Youth Affairs

With the limited access to the delegation of youth affairs within the municipality, the youth of the municipality do not have access to youth empowerment programs provided by the government through the Ministry of Youth Affairs. Also, the council has no specific programs for youths. There are no youth empowerment centres as well as recreational facilities

The main youth activity is the organisation of football encounters among youths during youth day celebration and holiday periods. The different youth centres in the council area for the hosting of school activities are found in Bakingili and Idenau.

#### **4.2.19 Sport and Physical Education**

There are no infrastructures for sports and physical education. Also, no sensitisation programs are carried out on physical education. The population does not have any organised team for sports, except for the spontaneous football clubs that are usually organised during special occasions or tournaments.

#### 4.2.20 Women's Empowerment and the Family

Although the population of the women is more than that of the men, there is no Women Empowerment Centre in the Municipality. There is however, an elected women's leader, acting as the president of the Women's Forum and responsible for organising and sensitising women on their rights. Some women groups have been trained on various income generating activities. Prominent among them is the progressive and struggling women groups that have been trained on tie and die of materials, soap making, tailoring, and processing of cassava to flour, spaghetti, fufu and garri.

The problems that were identified in relation to women's empowerment and the family were low rate of education of men, women and children, gender based violence, insufficient sensitisation on women's right and the family.

#### 4.2.21 Employment and Vocational Training

There are three employment and vocational training centres in the Municipality. These are the SAR-SM, Professional College of fisheries and Agriculture Debundscha and Community Education Action Centre (CEAC) found in Idenau. The enrolment in SAR-SM is low but the trades/vocations vary from carpentry, electricity, Building and construction, for boys to tailoring/seamstress and home Economics for girls. The Professional College of Fisheries and Agriculture train students in two stages which are the graduate programme for trainers and the youth programme for empowerment. CEAC offer capacity building programs for the population and work more with youths and CIGs. Some of the problems faced by these institutions include insufficient personnel, inadequate risk allowance, inadequate equipment/machineries for the workshop and limited access to service boat for transportation of students from maritime villages.

#### 4.2.22 Small and Medium-size Enterprises, Social economy and Handicrafts

There are limited opportunities for enterprise development as well as development of handicrafts, available for the population. However there are existing potentials that can be identified, studied and developed. There are handicrafts in Isobe, Idenau, Enyenge and Kosse II making fishing baskets on a smaller scale. The activity is insignificant in the social economy due to limited access to market.

#### 4.2.23 Social Affairs

There have been a number of programs under this sector in the Municipality. Most of these programs are geared towards assisting Orphans and vulnerable children (OVCs) as well as the elderly. There is one orphanage in the entire municipality known as the Destitute Home. There are no social centres in the area but they depend solely on the Limbe Social centres. The council benefit directly or indirectly during organisation of the day of the African Child Support (16th June).

Some of the problems encountered in this sector include:

- Maltreatment of children by foster parents.
- Low level of education in case of the death of one of the parents. The children need to work harder to take care of school needs or drop out of school. Cases of these were recorded in the urban space of Idenau and Bakingili
- The aged of about 70 and above who do not have children receive little or no attention from other family members.
- There is high rate of juvenile delinquency in the municipality resulting to "Pikin born pikin" where in young girls of about 12-15 years get pregnant for an unknown person and give birth in their parents' houses. They depend on their parents for survival and yet bring in another dependent. These children are not well taken care of and most often venture into the streets for survival.

#### 4.2.24 Scientific Research and Innovation

Very little scientific research has been carried out within the municipality; however, there exist a number of research areas that need to be improved. Among which are the petroleum, fisheries, agriculture, geology, and educational sectors.

#### 4.2.25 Industry, Mines and Technological Development

The delegation of industry, mines and technological development is not available in the Municipality. There are however several mining companies and industry that are either located within the municipality or carry out some work there. These include:

- Cameroon Development Corporation (CDC) which has a palm oil processing plant located at Idenau
- EURO Oil Company
- GLENCOL Oil Exploitation Company
- Elf Serepca Exploration company

There are no mining industries in the area and very little research has been carried out to ascertain the types and quantity of minerals available in the area. There is a probability that valuable mineral resources could be found in the area.

#### 4.2.26 Posts and Telecommunications

There are no postal services within the municipality with telephone network coverage of about 80%. The level of coverage fluctuates in some communities especially in the maritime area. The MTN and Orange mobile telephone network have their antennas at Bakingili, Debunscha and Idenau. This helps to improve network coverage in the communities and environs.

#### 4.2.27 Labour and Social Security

CDC is the Main employer in the municipality in addition to other employers in the private educational and health institutions. The workers of CDC have insurance covering them and their children. There is no delegation of Labour and social Security in the municipality, and the services are not rendered in the municipality for control of the situation of employees. Most of the employees are not aware of the labour code and are ignorant of their rights and benefits.

There is high rate of unemployment in the municipality. There is need for more vocational training centres where the youth can acquire skills and create jobs for themselves. Some of the problems identified during the diagnosis include:

- Low salaries
- No job security especially with CDC workers and the part time workers with the petroleum industries.
- Limited incentives from the employers
- Risky working conditions

Limited opportunities for pension collection due to the nature of the contracts, which is mostly temporal.

#### 4.2.28 Communication

There are no communication services within the municipality but there is a multi purpose tele centre in Bakingili that is not yet operational.

More so, there is inadequate reception of national radio and Television signals and absence of internet facilities. The only TV signal captured is from neighbouring Equatorial Guinea. Consequently, reception is boosted only through the use of parabolic antennas or cable lines which are not affordable by a majority of the population.

## 4.3 Common problems and needs identified by sectors

# Table 3 TABLE OF RECURRENT PROBLEMS, CAUSES, EFFECTS AND NEEDS IDENTIFIED IN THE IDENAU COUNCIL SECTOR 1 : AGRICULTURE

Core Problem	Causes	Effects	Needs
	• Inadequate know-how on improved farming techniques		• Organisation of trainings on improved farming techniques and
	<ul> <li>Limited access to farmland</li> </ul>	<ul> <li>Reduction in income</li> </ul>	utilization of agricultural inputs
	Limited access to improved planting materials and	<ul> <li>Poor standard of living</li> </ul>	<ul> <li>Increase access to improved planting materials</li> </ul>
Low	agricultural inputs	<ul> <li>Low purchasing power</li> </ul>	<ul> <li>Recruit trained agricultural extension personnel</li> </ul>
agricultural	<ul> <li>Limited access to extension services</li> </ul>	• Famine	<ul> <li>Sensitise farmers on group dynamics and record keeping</li> </ul>
production	High cost of farm inputs and phytosanitary products	<ul> <li>Rural Exodus</li> </ul>	<ul> <li>Creation of functional farmers house</li> </ul>
	<ul> <li>Difficulty in evacuating farm produce</li> </ul>	<ul> <li>Reduction in population</li> </ul>	<ul> <li>Creation and maintenance of farm to market roads</li> </ul>
	<ul> <li>Insufficient conservation and storage facilities</li> </ul>	• Divert attention to other IGA	• Restructuring of CIGs into cooperative societies and/or union
	<ul> <li>Destruction of produce by stray animals</li> </ul>		of CIGs

#### **SECTOR 2** : LIVESTOCK, FISHERIES AND ANIMAL INDUSTRIES

Core Problem	Causes	Effects	Needs
Fishery :	<ul><li>Insufficient fishing equipment.</li><li>Inadequate know-how on fishing methods.</li></ul>	<ul><li> Reduction in fish production</li><li> Poor access to desired species of fresh</li></ul>	<ul> <li>Sensitise and improve access to professional fishery training school</li> </ul>
Low Fish production	<ul> <li>Restriction on fishing sites (especially platform fishing zone)</li> <li>Poor assistance to fishermen</li> <li>Poor organisation of fishermen.</li> <li>Limited access to fishery training school</li> <li>Indiscriminate fishing by trawlers/industrial fishermen</li> <li>Inadequate storage facilities (especially for fishermen)</li> <li>Absence of modern drying facilities for fish mongers</li> </ul>	<ul> <li>fish.</li> <li>High incidence of fishing conflicts</li> <li>High exploitation of mangrove for the drying of fish</li> <li>High rate of eye infections for the fish mongers using traditional methods of drying</li> </ul>	<ul> <li>Create grants/loan scheme to enable fishermen acquire materials</li> <li>Caution industrial fishermen to maintain off- shore distance and fish sustainably</li> <li>construction of modern fish smoking ovens in the villages</li> <li>Restructuring of fishermen CIGs</li> </ul>
Livestock: Low animal production	<ul> <li>Limited access to veterinary services</li> <li>High cost of animal feed</li> <li>Poor knowledge of the different pests and diseases</li> <li>Poor techniques of animal rearing (free range)</li> </ul>	<ul> <li>High rate of disease outbreaks</li> <li>Poor development of animals</li> <li>Development of epidemics</li> <li>Low quality of meat</li> <li>Low revenue</li> <li>Conflicts within community</li> </ul>	<ul> <li>Capacity building on intensive methods of rearing animas</li> <li>Training on animal feed production</li> <li>Provide grants/loan to animal rearing CIGs</li> <li>Restructuring of CIGs</li> </ul>

#### **SECTOR 3** : STATE PROPERTY AND LAND TENURE

Core Problem	Causes	Effects	Needs
State Property :	<ul> <li>Erosion and sea encroachment</li> </ul>	<ul> <li>Loss of valuable property</li> </ul>	<ul> <li>Resettlement of inhabitants at risk</li> </ul>
Limited access to	• Absence of title deeds of conveyance for state and private property	<ul> <li>Illegal possession of land</li> </ul>	zones.
settlement land	<ul> <li>Absence of technical personnel on state property</li> </ul>	<ul> <li>Conflict within and between</li> </ul>	Create a focal point of the sector in the
(state property)	• Poor community sensitisation on the importance of land titles and	community members	municipality and facilitate access to
	how to go about it		title deeds
Land Affairs :	<ul> <li>Mismanagement of available land and resources</li> </ul>	Land scarcity	• Sensitisation of the population on land
Inappropriate land	<ul> <li>Unstable land acquisition methods</li> </ul>	<ul> <li>Increase source of expenditure by</li> </ul>	tenure and acquisition system.
tenure system	<ul> <li>Rampant sale of land leased by CDC</li> </ul>	renting farmland	<ul> <li>Regulate the sale of land especially that</li> </ul>
,		<ul> <li>Multiple sale of same piece of land</li> </ul>	leased by CDC

#### **SECTOR 4** : URBAN DEVELOPMENT AND HOUSING

Core Problem	Causes	Effects	Needs
Inappropriate	<ul> <li>Haphazard dumping of refuse</li> </ul>	Environmental pollution	<ul> <li>Provide access to urban</li> </ul>
waste	<ul> <li>Inadequate sensitisation on environmental health</li> </ul>	• Prevalence of air borne diseases	development facilities
management	<ul> <li>Absence of waste management scheme</li> </ul>	Increase source of expenditure in health	<ul> <li>Creation of a functional</li> </ul>
		units	communication, and pipe borne water network
Poor town planning	<ul> <li>Absence of partnership protocol agreement between the council and MINDUH</li> </ul>	<ul> <li>Inability to receive assistance from MINDUH</li> </ul>	<ul> <li>Put in place a wide diffusion of a town plan</li> </ul>
	<ul> <li>Poor financial capacity of the population</li> </ul>	Possibility of fire disaster	Facilitate access to construction
	<ul> <li>Insecurity of occupied land</li> </ul>	• Haphazard construction of houses	and building materials/equipment
	<ul> <li>Absence of basic urban facilities such as pipe borne water and communication signals</li> </ul>	Rural exodus	
High rate of	Poor drainage system	Increase in stagnant water points	Resettlement of inhabitants
flooding	Poor road network	<ul> <li>Increase in mosquito breeding areas.</li> </ul>	Construction of embankment
_	<ul> <li>No embankment around the coast of the maritime villages</li> </ul>	Destruction of property	especially in the maritime area.

### **SECTOR 5** : ENVIRONMENT AND NATURE PROTECTION

Core Problem	Causes	Effects	Needs
High rate of	Inadequate reforestation	Loss of species	Increase environmental field staff
Environmental	Poor management of natural resources	Arrival of invasive species	<ul> <li>Increase sensitisation on environmental</li> </ul>
degradation	Coastal degradation	High rate of erosion	protection
	High rate of wood exploitation	Climate change	<ul> <li>Provide an alternative method of fish smoking</li> </ul>
	High rate of mangrove exploitation	Increase rate of pollution	without using mangroves
	• Poor waste disposal in the coastal region from Bakingili to Enyenge		
	Limited access to environmental personnel		

### **SECTOR 6: FORESTRY AND WILDLIFE**

Core Problem	Causes	Effects	Needs
High rate of	Illegal exploitation of timber	Genetic erosion of species diversity	<ul> <li>Increase the number of technical staff in the</li> </ul>
deforestation	<ul> <li>Perturbation of forest for farming activities</li> </ul>	Climate change	forestry post
	• Inadequate know-how of forest management units (FMU)	<ul> <li>Seasonal changes which cause</li> </ul>	<ul> <li>Empower forest management committee</li> </ul>
	Insufficient Forest controllers	changes in the agricultural calendar	<ul> <li>Creation of Community forests</li> </ul>
	<ul> <li>Poor knowledge of forestry laws</li> </ul>		<ul> <li>Sensitisation on the forestry laws</li> </ul>

### **SECTOR 7** : TERRITORIAL ADMINISTRATION, DECENTRALIZATION AND MAINTENANCE OF ORDER

Core Problem	Causes	Effects	Needs
High rate of	<ul> <li>Insufficient security forces and measures</li> </ul>	Harassments of the population	More security measures should be put in place
insecurity	Molestation of inhabitants by some BIR officials	Chaos in communities and at high sea	<ul> <li>Sensitisation programmes for the BIRs</li> </ul>
	<ul> <li>Attack on fishermen at high sea</li> </ul>	Migration	
	Predominance of foreigners	Reduction in efficiency of labour	
	<ul> <li>Inadequate knowledge of civic rights</li> </ul>	Drop in production	

### **SECTOR 8** : BASIC EDUCATION

Core Problem	Causes	Effects	Needs
Limited access to	<ul> <li>Insufficient qualified teaching staff</li> </ul>	High illiteracy rate	<ul> <li>School buildings (classrooms)</li> </ul>
quality basic	<ul> <li>Insufficient classrooms and benches</li> </ul>	School drop outs	Qualified teaching personnel
education	<ul> <li>Poor maintenance of classroom</li> </ul>	Juvenile delinquency	Didactic materials and other school needs
	<ul> <li>Non allocation of nursery schools</li> </ul>	• Difficult socio-professional integration of youths	Equipment and furniture (pupil desks,
	<ul> <li>Inadequate didactic materials (pupils and teachers)</li> </ul>	Limit rate of school attendance by handicaps	tables chairs for teachers, etc.)
	<ul> <li>Absence of handicap facilities in schools</li> </ul>	High rate of prostitution	<ul> <li>Provision of handicap facilities</li> </ul>
	<ul> <li>Insufficient play grounds</li> </ul>	Incomplete school syllables	Construction of water points, latrines,
	<ul> <li>Insufficient latrines and water points in schools</li> </ul>		fences, libraries and recreational amenities
	Limited environmental and recreational facilities		

### **SECTOR 9** : SECONDARY EDUCATION

Core Problem		Causes		Effects		Needs
Limited access	•	Insufficient teaching staff	•	Inadequate post primary knowledge	•	Creation of a secondary school at Kosse II and
to quality	•	Insufficient specialised workshops/ laboratories	•	High rate of illiteracy		provide staff and equipment
secondary	•	Limited classroom, equipment and furniture	•	Juvenile delinquency	٠	Construct more classrooms at G.T.C. Bakingili
Education	•	Inadequate didactic materials (students and teachers)	•	Difficult socio-professional insertion of youths	٠	Qualified teaching personnel improved
	•	Non consideration of handicap in infrastructures	•	Handicap drop outs increased	•	Provide sufficient didactic materials and
	•	Absence of school libraries	•	High rate of prostitution		other school needs
	•	Insufficient play grounds	•	Rural exodus	٠	Equipment and furniture (pupil desks, tables
	•	Insufficient latrines and water points in schools	•	School calendar not followed		chairs for teachers, etc.) for schools
	•	Limited knowledge of parents on child education	•	Incomplete school syllables	•	Construction of water points, latrines, fences,
	•	Limited environmental and recreational facilities				libraries and recreational amenities

### **SECTOR 10** : HIGHER EDUCATION

Core Problem	Causes	Effects	Needs
Difficult access to	• Absence of university and other professional education facilities	• Difficult access to socio-professional training	Offer scholarships to youths who
higher education	<ul> <li>Insufficient communal financial means</li> </ul>	Juvenile delinquency	have completed secondary
	<ul> <li>Long distances to University institutions</li> </ul>	Under-development	education
	<ul> <li>Insufficient financial means of parents</li> </ul>	Insufficient intellectuals	

### SECTOR 11: PUBLIC HEALTH

Core Problem		Causes		Effects		Needs
Poor access to	•	Absence of a resident doctor	•	High cost of health treatment	•	Resident medical personnel
quality health	•	High cost of drugs	•	Population turn to local herbalists and	•	Sufficient and modern equipment (beds,
care facilities	•	Inadequate laboratory equipment		automedication		refrigerators, laboratory equipment, staff
	•	Non availability of essential drugs	•	Prevalence of diseases and high infant		lodging etc.)
	•	Inadequate coverage of community outreach programmes		mortality	٠	Well equipped Pharmacies and essential
	•	Limited transport facilities	•	Rural exodus and drop in labour force		drugs
	•	Long distance to main hospital	•	Drop in per capital income and increase in	٠	Regular trainings and seminars
				expenditure leading to poor living standards	•	Enforce Community outreach programmes
Vulnerability of	•	Inadequate sensitisation of the population	٠	Spread of HIV	•	Periodic sensitisation programmes.
the population	•	Limited access to prevention means, care and support	٠	High death rate	•	Assistance to people living with HIV/AIDS
to HIV and		services	•	High cost of health treatment		(PLWHA).
AIDS	٠	Stigmatisation and discrimination of persons living with HIV	•	Drop in labour force		
	•	Non functioning of local AIDS control and health area	•	Drop in per capital income		
		committees				

### **SECTOR 12:** ENERGY AND WATER

Core Problem		Causes	Effects	Needs
Energy: Poor access to electricity supply	•	No connection to the rural electricity network Non functional leister electricity plant in Sanje Inadequate electricity supply (Low voltage)	<ul> <li>Reduced economic activities</li> <li>Difficult access and usage of new technologies</li> <li>High dependency on alternative local sources of energy</li> <li>Difficulties to study or work at night</li> <li>High rate of insecurity</li> </ul>	<ul> <li>Rehabilitation of all rural electrification networks in the maritime areas</li> <li>Extension of the national electricity supply network to Etome, Sanje, Kosse II and Enyenge</li> </ul>
		in other villages with electricity network	High expenditure on fuel for personal generators	
Water : Limited	•	Break down of pumping engine in Bakingili Technical fault at reservoir in Debundscha	Long distances to fetch drinking water	• Rehabilitation of existing scan water in Bakingili, Debundscha, Etome and Njonji.
access to portable water	•	Poor management of existing sources	<ul> <li>High incidence of accidents along the road to get drinking water</li> </ul>	• Provision of portable water supply in Idenau,
	٠	Ineffective water management committees	<ul> <li>Prevalence of water borne diseases</li> </ul>	Sanje and Kosse II
	•	Poor treatment of available sources like the community wells in Enyenge, Kosse II and Sanje		<ul> <li>Proper management of the other water sources</li> <li>Formation of functional management committees</li> </ul>

### **SECTOR 13** : PUBLIC WORKS

Core Problem	Causes		Effects		Needs
Poor access to	<ul> <li>Poor development of farm to market roads</li> </ul>	•	Difficulty in evacuating farm produce to the market	٠	Develop farm to market roads
farm to market	• Poor maintenance of critical points along Limbe -	•	Drop in level of economic activities	٠	Rehabilitation of Bibunde bridge in Idenau
roads	Idenau -Sanje road especially the Bibunde bridge	•	High cost of transport and basic products		and the bridge to Debundscha beach
	<ul> <li>Bad state of roads, culverts and bridges</li> </ul>	•	Rural exodus	٠	Maintenance of existing road network
	Inadequate maintenance of existing earth roads	•	Low profit margin and drop in per capita income	٠	Extension of road network to other
	Poor government policy on rural road allocation	•	High rate of accidents		communities such as Kosse II, Sanje and
	<ul> <li>Poor community mobilisation</li> </ul>	•	Limited circulation of goods and services		Etome
Limited access to	<ul> <li>Mismanagement of resources</li> </ul>	•	Poor revenue generation by the council	٠	Rehabilitation of the wharf
modern landing	Neglect by state	•	Concentration at Idenau wharf		
facilities along	<ul> <li>Poor community organisation</li> </ul>	٠	High crime wave		
maritime coast					

#### **SECTOR 14** : SOCIAL AFFAIRS

Core Problem		Causes		Effects		Needs
Limited access	•	Absence of social centre	•	Psychological trauma	•	Construction of a social centre
to basic social	•	Limited access to social workers	•	Juvenile delinquency	•	Recruitment of social workers
facilities	•	Non existence of a data base of vulnerable persons	•	High incidence of teenage pregnancies	•	Offer psycho-social assistance to
	•	Poor assistance to vulnerable population	•	Increase in population of vulnerable children		OVCs
	•	Negligence of handicap facilities in construction of public structures	•	Limit integration of handicaps	•	Establishment of a list of OVCs

### **SECTOR 15**: WOMEN EMPOWERMENT AND THE PROMOTION OF THE FAMILY

Core Problem		Causes		Effects		Needs
Marginalization	•	Absence of women empowerment programmes	•	Insufficient opportunities for women and the girl child	•	Creation of women empowerment
of women and	•	Little or no exposure of women	•	High dependence of women on the men		centres in the municipality
children	•	Weak economic power of women	•	Inadequate parental care	•	Sensitisation on the rights of
	•	Insufficient representation of women in development	•	Prevalence of premarital child-birth (« pikin born pikin »)		women and the family
		and political forums	•	Rural exodus	•	Compulsory education of the girl
	•	Inadequate sensitisation of the rights of women and	•	Fragile family structures		child
		the girl child	•	Prevalence of illegal marriages (« come we stay »)	٠	Train women on income generation
	•	Child labour	•	Ignorance on gender equality issues		

### **SECTOR 16: YOUTH AFFAIRS**

Core Problem	Causes	Effects	Needs
Limited access	Absence of youth development centre	<ul> <li>High rate of unemployment</li> </ul>	<ul> <li>Creation of a functional youth centre</li> </ul>
to youth	<ul> <li>High rate of drop outs due to poverty of parents</li> </ul>	High illiteracy rate	<ul> <li>Recruitment of youth trainers and animators</li> </ul>
empowerment	Limited entrepreneurial capacities	Juvenile delinquency	<ul> <li>Capacity building on youth empowerment</li> </ul>
facilities	Poor mobilisation of youths to participate in income generating	High rate of teenage pregnancies	programmes
	activities	Spread of HIV and AIDS	<ul> <li>Increase sensitisation of youths on available</li> </ul>
	<ul> <li>Insufficient trainers and youth counsellors</li> </ul>	Rural exodus	opportunities

### SECTOR 17: SPORTS AND PHYSICAL EDUCATION

Core Problem	Causes	Effects	Needs
Limited access	<ul> <li>Insufficient sporting activities</li> </ul>	<ul> <li>Low physical exercise leading to cardiac diseases</li> </ul>	<ul> <li>Construction of a sports complex in Idenau</li> </ul>
to sporting	<ul> <li>Inadequate sport equipment in schools</li> </ul>	• Poor development of sports and leisure disciplines	<ul> <li>Proper management of the different sports</li> </ul>
activities	<ul> <li>Absence of sports organisations</li> </ul>	• Poor participation in regional football tournament	facilities available
	<ul> <li>Insufficient sport teachers in the different</li> </ul>	or other sports competition	<ul> <li>Employment of sport teachers in schools</li> </ul>
	schools		<ul> <li>Organisation of sporting activities</li> </ul>

### **SECTOR 18** : TRANSPORT

Core Problem	Causes	Effects	Needs
Limited access to quality transport facilities	<ul> <li>Absence of speed brakes and road signs along the road</li> <li>Non existence of transport agencies in the municipality</li> <li>Non respect of transport rules</li> <li>High cost of transportation</li> <li>Poor state of vehicles and engines used for transportation</li> <li>Overloading of vehicles</li> <li>Dominance of clandestine vehicles</li> <li>Insufficient transport boats and engines in water transport</li> <li>Non provision of safety measure such as life jacket in water transport and seat belts in land transport</li> </ul>	<ul> <li>High incidence of accidents in road and the Ocean</li> <li>Increase sources of expenditure</li> <li>Low standard of living</li> <li>Road insecurity</li> </ul>	<ul> <li>Reorganisation of rural transportation means</li> <li>Construction of speed brakes along the road (at Bakingili, Njonji, Debundscha, Idenau)</li> <li>Acquisition of communal transport vehicles and boats</li> <li>Provision of life jackets to travellers by sea</li> <li>Check on seat belts</li> <li>Restrict areas ploughed by commercial motor bikes</li> </ul>

### **SECTOR 19** : EMPLOYMENT AND VOCATIONAL TRAINING

Core Problem		Causes	Effects	Needs
Limited access	•	Insufficient capacity building on employment strategies	<ul> <li>High crime wave</li> </ul>	<ul> <li>Provide technical services in this sector</li> </ul>
to employment	•	Limited capital to establish self reliance skills	<ul> <li>Juvenile delinquency</li> </ul>	• Construct and equip vocational training centres in the two urban spaces
opportunities	•	Limited vocational training for the unemployed	<ul> <li>Prostitution</li> </ul>	<ul> <li>Register unemployed with the National Employment Fund (NEF)</li> </ul>
	•	Poor qualification of job seekers	<ul> <li>Rural exodus</li> </ul>	Create self reliance schemes

### SECTOR 20 : SMALL AND MEDIUM SIZE ENTERPRISES AND HANDICRAFT

Core Problem	Causes	Effects	Needs
Enterprises : Inadequate development of	<ul> <li>Absence of structures and facilities</li> <li>Weak vision and entrepreneurial capacity</li> <li>High taxes</li> </ul>	<ul> <li>Proliferation of clandestine businesses</li> <li>Weak economic power of the</li> </ul>	<ul> <li>Creation and institution of functional facilities</li> <li>Sensitisation on the</li> </ul>
economic activities	<ul> <li>Limited opportunities for youths (mechanics, tailoring, panel beating/welding etc)</li> <li>Low capacity and skills of the population</li> <li>Poor identification of skills</li> <li>Ignorance on procedures and formalities on creation of enterprises</li> </ul>	<ul><li>population and the council</li><li>Insufficient revenue collection and diversification strategies</li></ul>	services of small and medium size entreprises
Handicraft : Poor development of Handicraft	<ul> <li>Limited capital to develop skills</li> <li>Reluctance of youths and other unemployed to practice boat making or maintenance</li> </ul>	Increase unemployment	Funding for handicrafts

### **SECTOR 21 : SCIENTIFIC RESEARCH AND INNOVATIONS**

Core Problem		Causes		Effects		Needs	
Limited access to	•	Absence of research facilities (structures, personnel, equipment)	•	Low quality of	•	Training of local community researchers	
improved research	•	Poor dissemination of scientific innovations		agricultural produce	•	Acquisition of agro pastoral innovations	
activities	•	Poor policy formulation and programming by the state with petroleum companies	•	Rudimentary	•	Award of best innovative research	
especially in	•	Absence of information on agro pastoral innovations		production techniques		projects	
agriculture,	•	Absence of improved planting materials	•	Poor production	•	Carry out research on other mining	
livestock and	•	Poor promotion of sectoral activities	•	Low revenues		potentials	
geology	•	Difficulty in training and committing local community researchers	•	High poverty rates			

### SECTOR 22 : TOURISM

Core Problem	Causes	Effects	Needs
Difficulty in	• Absence of tourism services in the municipality	• Limited reception of tourists relative	Development of touristic sites
promoting	• Insufficient touristic infrastructure like hotels and	to the attractions	<ul> <li>Create sectoral services in the municipality</li> </ul>
touristic	restaurants	<ul> <li>Poor economic power of the</li> </ul>	Construction of tourist infrastructures in Idenau in
activities	<ul> <li>Poor mobilisation of resources Limited</li> </ul>	population	addition to Semme beach and Tsaben beach hotels at
	accessibility to some tourist attractions such as	<ul> <li>Depletion of tourist potentials</li> </ul>	Bakingili
	Lake Nachtigal, Mt Etinde and Enyenge creek	<ul> <li>Reduction in revenue</li> </ul>	<ul> <li>Improve accessibility to touristic sites</li> </ul>
			<ul> <li>Development of other transportation means</li> </ul>

### Sector 23 : CULTURE

Core Problem	Causes	Effects	Needs
Poor	<ul> <li>Poor development of cultural initiatives</li> </ul>	<ul> <li>Loss of cultural</li> </ul>	<ul> <li>Sensitisation and promotion of cultural initiatives</li> </ul>
valorisation of	<ul> <li>Inadequate socio-cultural infrastructures such as community halls, museum,</li> </ul>	values	<ul> <li>Construction and rehabilitation of community halls</li> </ul>
traditional	traditional memory bank, statues.	<ul> <li>Loss of cultural</li> </ul>	<ul> <li>Organisation and support of cultural artists</li> </ul>
cultures	<ul> <li>Poor mobilisation of resources</li> </ul>	memory bank and	<ul> <li>Establishment of cultural houses and museums</li> </ul>
	<ul> <li>Dominance of Christianity and modernisation</li> </ul>	identification	
	<ul> <li>Misunderstanding of cultural values in relation to education</li> </ul>		

### **SECTOR 24** : MINES, INDUSTRIES AND TECHNOLOGICAL DEVELOPMENT

Core Problem		Causes		Effects		Needs
Difficult access	٠	Poor government policy on the appropriation of royalties	•	Conflicts between exploiters and	• R	Recruit some inhabitants in the sector
to development	•	Inadequate collaboration of the communities with the explorers		inhabitants especially fishermen.	• E	exploitation companies should fulfil
within the	•	Inappropriate conduction of consultative talks with the	•	Over exploitation of resources	р	payment of royalties to the council and
mining sector		communities and the council	•	None financing of micro projects by	C	communities concerned
	٠	Poor impact assessment studies on the environment for petroleum		companies		Make available to the council all feasibility
		products	•	High rate of poverty in the	S	tudies and research carried out on the
	٠	Inadequate participation of the council in the valorisation of		communities	n	nining sector
		mining potentials				

### **SECTOR 25** : COMMERCE

Core Problem	Causes	Effects	Needs
Limited access to market	<ul> <li>Disorganised marketing of producers and businessmen</li> <li>Inadequate diversification of commercial activities</li> </ul>	<ul> <li>Exploitation of the producers by traders (buyam-sellam)</li> </ul>	<ul> <li>Construction of modern periodic markets in Idenau and Bakingili</li> </ul>
infrastructure	Improper waste disposal	High price speculation on	Organisation of mini trade fairs and agric shows for the
	<ul> <li>Poor market information on prices of goods in other areas</li> </ul>	<ul><li>products</li><li>Insufficient revenue</li></ul>	<ul><li>commercialisation of produce and other products</li><li>Institute proper waste disposal and management system</li></ul>
		Environmental pollution	Creation of a municipal chamber of commerce

### **SECTOR 26** : POST AND TELECOMMUNICATIONS

Core Problem	Causes	Effects	Needs
Limited access to	Non functional postal services	<ul> <li>Risk of going to Limbe for postal services</li> </ul>	Postal services in Bakingili and Idenau
post and telecommunication services	<ul> <li>Poor MTN and Orange network reception</li> <li>Absence of MTN and/or Orange antennas in Maritime area</li> </ul>	<ul> <li>Poor exposure to the outside world (global enclavement)</li> <li>Difficulties in communicating with people out of the community</li> <li>Reduced economic growth</li> </ul>	<ul> <li>should go operational</li> <li>Installation of MTN/Orange network antenna in Kosse II, Enyenge or Sanje</li> </ul>

### **SECTOR 27** : LABOUR AND SOCIAL SECURITY

Core Problem		Causes	Effects	Needs
Limited access	•	Insufficient number of stabilised organisations	<ul> <li>Underemployment</li> </ul>	<ul> <li>Create and equip the sector with active</li> </ul>
to labour and	•	Poor organisation and structuring of self reliance services	<ul> <li>Ridiculous stipend relative to labour</li> </ul>	personnel
social security	•	Non registration of workers with National Social Insurance Fund	<ul> <li>Poverty and misery</li> </ul>	<ul> <li>Promote the rights of the employee</li> </ul>
facilities	•	Ignorance of the employees	Rural exodus	<ul> <li>Registration of workers with National Social</li> </ul>
	•	Poor sensitisation from the sectoral personnel		Insurance Fund (NSIF)

### SECTOR 28 : COMMUNICATION

Core Problem	Causes	Effects	Needs
Limited access	Absence of CRTV antenna	Population is less informed	<ul> <li>Installation of</li> </ul>
to	<ul> <li>Poor reception of radio signals</li> </ul>	<ul> <li>Poor exposure to the outside world (global enclave)</li> </ul>	CRTV antenna
communication	• Poor access to television, radio and internet signals	Misinformation about national issues	• Establishment of a
signal	No community radio	• Inadequate awareness on employment and other development opportunities	community radio
0.8.1		Reduced economic growth	

## **CHAPTER FIVE**

### **5.0 STRATEGIC PLAN**

5.1 Vision and objectives of the Council Development Plan

VISION

By 2035, The Idenau Council area is well developed with diverse economic activities, healthy environment, adequate access to health care, commerce, water, energy, culture, education, sports, social and local economic development facilities. Accessibility is improved; tourists' attractions and infrastructures are well developed thus increasing international trade, per capita income and standard of living in the municipality.

### **GOAL OF THE IDENAU COUNCIL**

To sustainably improve on the livelihood of the population of the Idenau Municipality by providing quality basic services in the domain of Health, Water and Energy, Education, Tourism, Environmental and Socio-economic Infrastructures so as to reduce poverty and enhance opportunities for growth and employment by 2015.

# 5.2 Logical framework by sector in Idenau Council Area

### 1. AGRICULTURE

	Strategy	Indicators	Sources of	Assumptions
Level	Formulation		Verification	•
Overall Objective	Sustainable increase of foodstuff in the municipality	Foodstuff available in all planting seasons in the municipality for consumption by 2015	<ul> <li>Interviews</li> <li>Administrative</li> <li>reports</li> </ul>	Favourable climatic conditions
Specific Objective	Agricultural production and productivity improved	Agricultural production increase by at least 50% each year	<ul> <li>Farm visits</li> <li>Administrative</li> <li>reports</li> </ul>	-Favourable climatic conditions -Natural disaster reduced
Results	Knowledge on improved farming techniques improved	At least, 70% of farmers practice improved farming techniques by 2015	<ul> <li>Farm visits</li> <li>Administrative</li> <li>reports</li> </ul>	Bush fires reduced
	Access to improved planting materials, phyto-chemicals and fertilizers improved	At least, 40% of farmers use improved planting materials, phyto- chemicals and fertilizers	- Farm visits - Administrative reports	Dubious business operators reduced
	Farms and farm sizes increased	At least 40% of farmers cultivate on at least 0.5ha by 2015	<ul> <li>Farm visits</li> <li>Administrative</li> <li>reports</li> </ul>	Leased land not sold for settlement
	Stray animals reduced	At leastb70% of livestock farmers confine and tether their animals by 2013	<ul> <li>Farm visits</li> <li>Testimonies</li> <li>Administrative</li> <li>reports</li> </ul>	Administrative laws respected.
ACTIVITIES		QUANTITY	PLACE	COST(FCFA)
•	tural facilities increased edge on improved farming s improved			
1.1 Train farmers on improved farming techniques		7	Idenau, Bakingili, Etome, Njonji, Sanje, Enyenge, Kosse II	700,000
1.2 Establis	sh demonstration farms	8	Idenau, Bakingili, Etome, Debundscha, Njonji, Sanje,	800,000

Strategy		Indicators	Sources of	Assumptions
Level	Formulation		Verification	
			Enyenge, Kosse II

26. Posts and Telecommunications	5,800,000
27. Labour and Social Security	210,000
28. Communication	410,000
TOTAL COST OF CDP	7,237,790,000

## 5.4 Land use plan

Land use in the municipality is divided between natural forests, largely undisturbed forests, (secondary logged), agricultural land (fallows, plantations and small-scale shifting cultivation). Primary forests are owned by the village, while individual ownership rights are only being conferred on land that is cultivated.

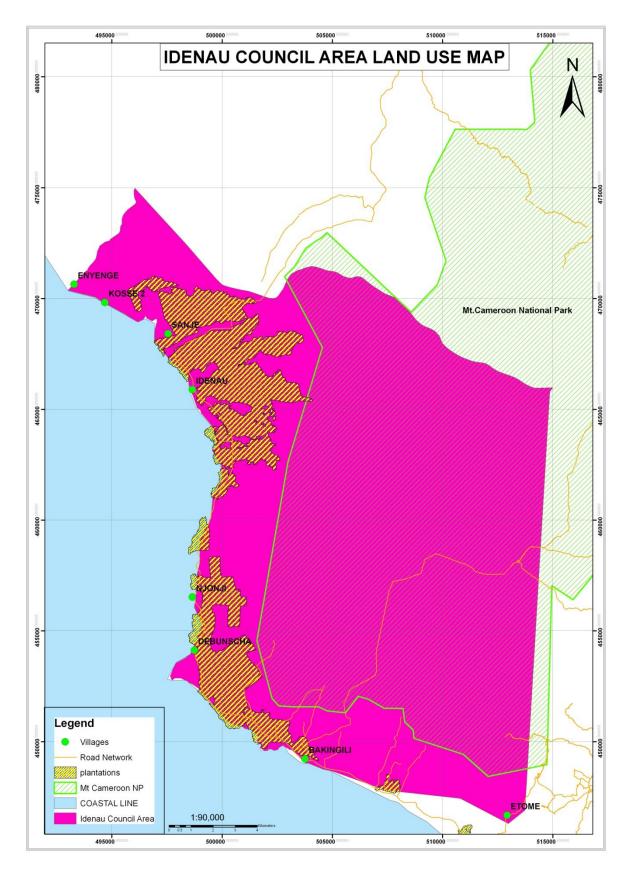

Fig. 3: The land use plan/land cover of the municipality

5       Increase the quantity of council assets and improve on their management       -       Purchase heavy duty equipment for road construction / rehabilitation, a garbage van, trash cans a -         •       Put in place a functional system for the management of assets	
5Increase the quantity of council assets and improve on their management-Purchase heavy duty equipment for road construction / rehabilitation, a garbage van, trash cans a -0Purchase heavy duty equipment for road construction / rehabilitation, a garbage van, trash cans a -0Purchase heavy duty equipment for road construction / rehabilitation, a garbage van, trash cans a -0Purchase heavy duty equipment for road construction / rehabilitation, a garbage van, trash cans a -0Purchase heavy duty equipment for road construction / rehabilitation, a garbage van, trash cans a -	xes for instance;
improve on their management - Put in place a functional system for the management of assets	
	nd vehicles
Institute depreciation values for all council assets	
6 Improve on the information management - Install internet facilities and lobby for CRTV antenna installation in the municipality	
system of the council - Train staff on the use of information technology	
- Create awareness on the activities and responsibilities of the council (organise public forums)	produce leaflets,
brochures, posters etc)	
7    Reinforce the collaboration with main    -    Identify all the main stakeholders	
stakeholders (Government services, socio – - Conduct an analysis of all the stakeholders (identify their strengths, weaknesses etc)	
economic organizations, civil society, religions - Establish strategies for collaboration	
bodies, traditional rulers etc) - Organise yearly evaluation meetings with all main stakeholders	

## 6.4Potential socio-economic impact (positive and negative) Optimizing and/or Mitigation measures

#### a) Possible Environmental Impacts

Type of micro projects in the	Possible positive Environmental	Possible negative Environmental Impacts	Mitigation measures
three years investment plan	Impacts	(Environmental Risk)	
Rehabilitation of Water schemes	<ul> <li>Reduction in the spread of Water Borne Diseases</li> <li>Increase access to portable water in communities</li> </ul>	Destruction of the soil structure through digging	Areas dug will be backfilled
Construction of classrooms and laboratories and Toilets	Conducive learning environment	<ul><li>Destruction of the natural environment</li><li>Poor waste disposal</li></ul>	<ul> <li>Areas dug should be backfilled and trees planted</li> <li>Trash cans should be placed around the school campuses</li> </ul>
Construction of Idenau Market	<ul><li>Improved hygiene and sanitation</li><li>Reduction in post harvest losses</li></ul>	<ul> <li>Destruction of soil structure through digging</li> <li>Poor waste disposal (papers, plastic containers, rotten food stuff etc)</li> </ul>	<ul> <li>Areas dug should be backfilled and trees planted</li> <li>Trash cans should be placed around the markets</li> </ul>
Construction of Council animal Production farm	<ul> <li>Improved Hygiene and sanitation</li> <li>Number of stray animals reduced</li> </ul>	<ul> <li>Destruction of soil structure through digging</li> <li>Poor waste disposal</li> <li>Air pollution</li> </ul>	<ul> <li>Areas dug will be backfilled</li> <li>Waste from the farm should be used as manure in farms</li> <li>Farm should be constantly cleaned and disinfected</li> </ul>
Construction of a slaughter House	Improved hygiene and sanitation	<ul> <li>Destruction of soil structure through digging</li> <li>Poor waste disposal and Pollution</li> </ul>	<ul> <li>Areas dug should be backfilled</li> <li>Area should be constantly cleaned and disinfected</li> </ul>
Construction of fish stacking hangers and fresh fish market	<ul><li>Improved hygiene and sanitation</li><li>Reduction of post harvest losses</li></ul>	<ul><li>Destruction of soil structure through digging</li><li>Poor waste disposal</li></ul>	<ul><li>Areas dug should be backfilled</li><li>Trash cans should be installed</li></ul>
Rehabilitate farm to market roads (Etome, Idenau, Bakingili, Sanje, Kosse II)	<ul> <li>Reduction in post harvest losses</li> <li>Improve transportation of goods to the various markets</li> </ul>	Destruction of soil structure through digging	Areas dug will be backfilled and trees planted
Construct low cost houses	Improved living conditions for the civil servants	<ul> <li>Destruction of the soil structure through digging</li> <li>Poor waste disposal</li> </ul>	<ul> <li>Areas dug should be backfilled and trees planted</li> <li>Trash cans should be installed</li> </ul>

#### b) Possible Social Impacts

Type of micro projects in the three years investment plan	Possible positive Social Impacts	Possible negative Social Impacts (Social I Risk)	Mitigation measures
Rehabilitation of Water schemes	<ul> <li>Reduction of water borne diseases</li> <li>Intensification and diversification of socio cultural activities due to increase time available</li> <li>Children will be more punctual at school leading to better performance</li> </ul>	Poor sanitation around water systems	Sensitisation of the population proper hygiene and sanitation
	<ul> <li>Improved hygiene and sanitation</li> <li>Change in gender roles (more men fetching water since the taps are at their door steps)</li> </ul>		
Construction of classrooms and laboratories and Toilets	<ul> <li>High performance in public exams</li> <li>Conducive learning environment</li> <li>Increased literacy rate</li> </ul>	Reduction in leisure activities due limited land	More allocation of land for play ground
Construction of Idenau Market	<ul> <li>Increase in the sales of produce</li> <li>Improve hygiene and sanitation</li> <li>Increase access to basic necessities in the municipality</li> </ul>	High crime wave, prostitution and juvenile delinquency	<ul><li>High security control</li><li>Sensitise the population</li></ul>
Construction of Council animal Production farm	<ul> <li>Increase Hygiene and sanitation</li> <li>Reduce the number of stray animals</li> <li>Destruction of crops by Animals reduced</li> <li>Increased access to livestock in the community</li> </ul>	<ul><li>Conflict in site selection</li><li>Conflict of interest</li><li>Air pollution</li></ul>	<ul> <li>Sensitisation of the community</li> <li>Animal production farm should be constantly cleaned</li> </ul>
Construction of a slaughter House	Improve hygiene and sanitation and access to fresh meat	Conflict in site selection and conflict of interests	Sensitisation of the population
Construction of fish stacking hangers and fresh fish market	Increased protein intake, Reduction in malnutrition and Food security ensured	Conflict in site selection	Compensation of land lords
Rehabilitate farm to market roads (Etome, Idenau, Bakingili, Sanje, Kosse II)	<ul> <li>There will be reduction in travelling hazards and risks</li> <li>Reduction in transport fares</li> <li>Transportation cost for goods to travel by vehicle and motorbike will significantly reduced</li> <li>Communities will notice an increase in traffic volume</li> </ul>	<ul> <li>Influx of thieves due to good roads</li> <li>High rate of juvenile delinquency and prostitution</li> </ul>	<ul> <li>High security control</li> <li>Sensitisation of youths</li> </ul>
Construct low cost houses	<ul> <li>Quality lodging facilities for Civil servants in the municipality</li> <li>Social interaction between staff, parents and students</li> <li>Reduced late coming and absenteeism from Duty post</li> </ul>	<ul><li>Conflict of interest</li><li>Limited privacy</li><li>Harassment of Single women</li></ul>	Sensitization of staff on mutual respect of each other

#### 6.5Summary Environmental Management Framework for mid-term investment plan

#### 6.5.1 Simplified environmental management plan (Socio environmental management plan)

The plan consist of the provision for carrying out of environmental impact and study each environmental measure envisaged in the triennial plan, actors costs, periods and follow-up indicators.

Environmental measures	Putting in place actors	Periods	Follow up actors	Costs	Observations
Training of Council Development agent's on environmental aspects within the PNDP's socio-	PNDP	2012 2013	MINEP Delegation ; MINAS Delegation ; PNDP	Incorporated into PNDP budget	
environmental management framework					
Use of the socio-environmental form.	Council Development officer	2012 2015	MINEP delegation ; MINAS delegation ; PNDP ; Municipal councilor ; Development Agent	Incorporated into PNDP budget	Related cost should be included in the micro project conception cost
Training of COMES on safeguarding the policies and the taking into account the socio environmental aspects	PNDP	2012 2015	MINEP Delegation ; MINAS delegation ;	Incorporated in the PNDP budget	
Provision for the carrying out environmental impact studies	PNDP, Mayor (Municipal Councillor)	2012 2015	MINEP delegation ; MINAS delegation ; PNDP ; Municipal councillor		In case of resettlement, the cost is to be borne by the Mayo
Follow up and monitoring of socio environmental management plan and of the entrepreneurs	Council Development Officer Entrepreneur	2012 2015	MINEP Delegation ; MINAS delegation ;	Incorporated in the PNDP budget	

## 6.6Annual Investment Plan for Idenau Council

## 6.6.1 Annual plan of priority projects (1<sup>st</sup> year)

PROJECT	TASKS	INDICATORS	PERSON	PARTNERS	PERIOD		MEANS	
			RESPONSIBLE			HUMAN	MATERIAL	FINANCIAL
Rehabilitation of water schemes in	Prepare Tender documents	Tender documents in place	Chief of works	PNDP/ COUNCIL		MINEE		10,000,000
Bakingili	Publish tender	Tender published and applications received

## **CHAPTER SEVEN**

## 7.0 MONITORING AND EVALUATION MECHANISM

#### 7.1 Monitoring and evaluation system (in relation to the AIP)

The M&E system of the Idenau council comprises actors with well defined duties and tools to enable a good information collection and transfer;

#### 7.1.1 Actors

The following actors will be involved in the monitoring and evaluation of the AIP of the council;

- Mayor and council members
- Monitoring and Evaluation Committee
- The Decentralised structures of government (Education, Health, Agriculture, Fishery, Health, Pubic Works etc...)
- The Village Development Committees
- Project management committee
- The Council Development Agent (VCD)
- Community Based Organizations (CBOs)
- Reach Out

# 7.2 Composition and functions of the committees in charge of monitoring and evaluation of the CDP

At the end of the elaboration of the CDP, an M&E (Follow-up) Committee at the level of the council was put in place to replace the Steering Committee and a Municipal Order signed by the mayor and the SDO published to give legitimacy to the committee.

S/n	Name	Role	Function
1	Kelly Esike	President	Councilor
2	Fonchenela Marie-	Secretary General	Development Agent
	Therese		
3	Nche Thomas Njungu	Public Relation Officer	Councilor
	Elive		
	Nzuk George	Member	
4	Tonde Gabriel	Member	Councillor
5	Mesembe Agarthha	Member	Councilor
6	Ndumbe Ekwalla	Member	Councilor
7	Augustine Kum	Member	Quarter Head (Enyenge)

Composition of the Follow-Up Committee of the council;

#### Duties of the Mayors, Council Members and M&E Committee

- Follow up work done by selected contractors as per the specifications on the contract award document
- Carry out random field visit to ascertain that work is been effectively executed
- Inform the different persons /structures responsible for implementing the activities about the council administrative procedures to obtain the necessary funds for the activity
- Conduct periodic reviews of the AIP in collaboration with the council executives
- Ensure strict implementation of the social and environmental management plan by all stakeholders
- Produce quarterly reports for level of realisation of micro projects and committee activities to the council
- Work in close collaboration with the council executive

#### Roles and Responsibilities of Members of the Follow-up Committee

#### 1. President

- Convene and preside over all meetings of the committee
- Ensure that the aims and objectives of the committee are met in the implementation and follow-up of micro projects earmarked in the CDP
- Ensure the follow-up and payment of allowances to committee
- Propose the replacement of uncooperative and dormant committee members

#### 2. Secretary

- Take down proceedings at meetings
- Produce various reports of the activities of the committee
- Perform other legitimate duties as assigned by the committee president in relation to the objectives of the structure

#### 3. Public Relation Officer

- Publicize the committee, its objectives, activities and achievements
- Perform other legitimate duties as assigned by the committee president in relation to the objectives of the structure

**The Decentralised Structures of Government** (Education, Health, Agriculture, Fishery, Health, Pubic Works etc...)

They will be responsible for the monitoring and evaluation of specific sectoral micro projects.

#### **Village Development and Project Management Committees**

The Village Development and Project Management Committees were created in villages where they were non existent. They will also ensure supervision and maintenance of micro projects to ensure sustainability and appropriation of projects in their various villages.

#### **Community Based Organisations**

They will monitor specific micro projects executed in their communities

#### LSO (Reach Out Cameroon)

As the partner facilitating the process, Reach Out Cameroon will provide technical support to the M&E Committee and the Council that are incharge of steering the CDP.

#### 7.3 M&E Tools and frequency for Reporting

#### **Tool 1 Project Evaluation Form Format**

This tool will be used quarterly to monitor the AIP by all the M&E actors involved in the process.

- Monthly follow up visits and production of progress reports
- Quarterly Monitoring and Evaluation and quarterly reporting

Programme Objective.....

Period of report......To.......

Specific Objective(s)	Results	Activities Realised	Activities no Realised	ot	Challenges	Observations/ Suggestions

#### **Tool 2 Project Evaluation Form Format**

This tool will be used for the monitoring of micro projects at all level by all the actors concerned in the M&E of the AIP and the various indicators defined in the AIP

Micro project	Micro project						
Strategic Actio	Strategic Action to be accomplished						
Date of Monit	Date of Monitoring and Evaluation						
What was planned to be done	Person Responsible	What has been done	What still has to be done	When should it be completed	What will be there to show that it has been done	Comments and reaction of the M&E committee	

Activity 1			
Activity 2			
Activity 3			
Activity 4			
Activity 5			
Activity 6			

#### **Tool 3 Log Books**

Log books will be placed at the level of each project sites. The book will be filled by the contractors and the actors in charge of M&E to ensure that norms and specifications are respected.

#### **Tool 4 Meetings and Progress Reports**

Quarterly meetings will be held at the council where progress reports are presented and important decisions taken.

#### 7.4 Review of the CDP and mechanism for the preparation of the next AIP

At the end of each year, the M&E committee will carry out an end of year evaluation of projects in the annual investment plan. Projects not realised will be re-planned with those for next year. At the end of three year the CDP will be reviewed and priority projects selected. A programming for the next three years and an investment plan will be done.

The Idenau council should organise periodic reviews of the AIP to ascertain the rate of realisation of the plan and also to correct gaps. At the end of the year, there should be an evaluation of planned activities viz its realisation. The evaluation exercise should inform the council on the various lapses and thereby enable them improve their performance for the next AIP.

At the end of every year, a new AIP should be elaborated taking into consideration the gaps and best practices of the previous plan. The council should be current with information on new orientations and emerging issues that could work to their advantage which should be exploited and integrated in the new AIP.

The services of competent development actors of the municipality should be sought, with the technical expertise of PNDP during the elaboration of the new plan.

## **CHAPTER EIGHT**

## 8.0 COMMUNICATION PLAN OF THE CDP

The communication plan is a tool which will inform the council on best possible ways to make the broadest publicity about its CDP to the public and to technical and financial partners.

The council will have to produce such a plan every time they are elaborating an Annual Investment Plan.

ACTION	TIMEFRAME	PERSONS RESPONSIBLE

and seek partnerships with other councils and funding bodies		Committee and Reach
as well as elites abroad		Out

#### **CHAPTER NINE**

#### 9.0 CONCLUSION

Idenau Council has successfully completed the elaboration of its development and investment plan. Several stakeholders from all the eight villages in the municipality were consulted and their aspirations have been captured in the plan. The entire process entailed a highly participatory approach which involved all the stakeholders with a participatory identification of needs in all the 28 sectors. There is now a strategic plan elaborated for all the sectors for a long term implementation. The council has identified several potential partners who could be solicited for assistance. The Follow-Up Committee which was put in place should be enabled to accomplish their task to the best of their ability for the success of this plan. They should be provided with adequate training to meet up with the task which lies ahead of them. It is incumbent on the management of the Council to immensely commit in fostering the implementation of the CDP by making available the necessary funds for monitoring of planned activities.

Finally, the Idenau Council Development Plan should henceforth serve as a tool for development which should be exploited by the community, technical and financial partners as well as collaborators, elites, government services, economic operators, just to mention these few. Above all, the needs identified should systematically guide the council's work in a non-partisan manner, for the interest of its entire population.

# 10.0 ANNEXES

## **10.1** Project presentation sheet for Annual Investment Plan (AIP)

Below is a summarised micro project template for identified needs and prioritised sectors at village level in the Idenau council area. **Micro Project Profile** 

Micro Project Prome	
Sector	Water and Energy
Micro project name	Rehabilitation of water schemes
<b>Objective (Impact on client)</b>	Access to quality potable water in the communities increased
Location	Bakingili
Technical partners	PNDP and Council
Time to complete project	As soon as funds are made available
Beneficiaries	Entire Bakingili village
Estimated cost of Project	10,000,000
Environmental Impact	Improvement of hygiene and sanitation
Social Impact	- Reduction of water borne diseases
	- Children will be more punctual at school leading to better
	performance
	<ul> <li>Improved hygiene and sanitation</li> </ul>
	- Change in gender roles (more men fetching water since
	the taps are at their door steps)
Maintenance Cost	1,000,000
Execution time	May 2012-December 2012

Sector	Secondary Education
Micro project name	Construction of workshops and classrooms and equipping
	with students desks and water points in the schools
Objective (Impact on client)	Access to quality secondary educational facilities increased
Location	GHS Idenau and GTC Bakingili
Technical partners	PNDP and Council
Time to complete project	As soon as funds are made available
Beneficiaries	GHS Idenau and GTC Bakingili
Estimated cost of Project	22,800,000
Environmental Impact	Conducive learning environment
Social Impact	<ul> <li>High performance in public exams</li> </ul>
	- Conducive learning environment
	- Increased literacy rate
Maintenance Cost	2,280,000
Execution time	May-December 2012

Sector	Basic Education
Micro project name	Construction of additional classrooms, supply of pupil desks), and Construct of latrines in the various schools
Objective (Impact on client)	Access to quality basic educational facilities increased
Location	Njonji, Sanje, Idenau
Technical partners	PNDP, ADB, Council
Time to complete project	As soon as funds are made available
Beneficiaries	GS Njonji, GS Sanje and GS I and II Idenau
Estimated cost of Project	46,100,000
Environmental Impact	Conducive learning environment
Social Impact	<ul> <li>Increase social interaction between civil servants and the population</li> <li>Reduce late coming and absenteeism fro job sites</li> </ul>
Maintenance Cost	4,610,000
Execution time	April-December 2012

Sector	Commerce
Micro project name	Construction of modern daily market, fresh and smoked
	fish markets
Objective (Impact on	Promote the growth of commercial activities by reducing
client)	poverty and improving the living conditions of the
chenty	populations
Location	Idenau
Technical partners	FEICOM, PNDP and Council
Time to complete project	As soon as funds are made available
Beneficiaries	Bibunde new layout and Bali quarters
Estimated cost of Project	75,000,000
Environmental Impact	- Planting of trees in the market premises
	<ul> <li>Reduction of waste management</li> </ul>
Social Impact	<ul> <li>Reduction of distances to market</li> </ul>
	- Availability of goods at the disposal of the communities
	- Increased in standard of living
Maintenance Cost	7,500,000
Execution time	May-December 2012

Sector	Public works
Micro project name	Rehabilitation of Etome-Batoke road
<b>Objective (Impact on</b>	Transportation of farm produce to markets within the
client)	municipality improved
Location	Etome, Idenau, Bakingili, Sanje, Kosse II
Technical partners	PNDP, Council, etc
Time to complete project	As soon as funds are made available
Beneficiaries	Etome villagers
Estimated cost of Project	10,000,000
Environmental Impact	- Reduction in post harvest losses
	- Improve transportation of goods from farm to markets
Social Impact	<ul> <li>Improve circulation of persons and goods</li> </ul>
	- Increase in the sales of goods and reduction of poverty
Maintenance Cost	1,000,000
Execution time	July-August 2012

Sector	Livestock
Micro project name	Construction of slaughter a house with slabs
Objective (Impact on client)	Animal production increased
Location	Idenau
Technical partners	PNDP, Council, etc
Time to complete project	As soon as funds are made available
Beneficiaries	Bibunde new layout and Bali quarters
Estimated cost of Project	4,000,000
Environmental Impact	- Reduction in post harvest losses
	- Improve transportation of goods from farm to markets
Social Impact	<ul> <li>Improve circulation of persons and goods</li> </ul>
	- Increase in the sales of goods and reduction of poverty
Maintenance Cost	400,000
Execution time	August 2012-October 2013

Sector	Fisheries
Micro project name	Construct fresh fish market, fish stacking Hangers, solar
Micro project name	dryers for fish and rehabilitation of ice plant
Objective (Impact on	Production and processing of fish improved
client)	
Location	Idenau
Technical partners	PNDP, Council, and PECTON
Time to complete project	As soon as funds are made available
Beneficiaries	Bali quarters
Estimated cost of Project	19,000,000
Environmental Impact	<ul> <li>Reduction in post harvest losses</li> </ul>
	<ul> <li>Improve the sales of fish</li> </ul>
	- Reduce air pollution through the use of local methods of
	drying fish
	- Reduction of mangrove and timber exploitation
Social Impact	<ul> <li>Improve circulation of persons and goods</li> </ul>
	- Increase in the sales of goods and reduction of poverty
Maintenance Cost	1,900,000
Execution time	August 2012-October 2013

Sector	Agriculture
Micro project name	Constuction of CEAC and sub agric post in Idenau
<b>Objective (Impact on</b>	Agricultural facilities increased
client)	
Location	Idenau
Technical partners	PIB, MINTP
Time to complete project	As soon as funds are made available
Beneficiaries	Idenau municipality
<b>Estimated cost of Project</b>	30,000,000
<b>Environmental Impact</b>	Working environment made conducive
Social Impact	Improved access to services
Maintenance Cost	3,000,000
Execution time	July-August 2013
